# LCS<sup>2</sup>

## from technical room to workstation

### ■ LCS<sup>2</sup> Cabling system products

Complete systems with a 20-year guarantee. The new LCS<sup>2</sup> cat. 6A (up to 500 MHz), cat. 6 (up to 250 MHz) and cat. 5e (up to 100 MHz) systems have been designed as coherent entities to optimise their performance. The systems are suitable for optical fibre cables as well as copper cables.

**See pages 14 to 39**

### ■ Legrand Synergies

The new LCS<sup>2</sup> systems integrate perfectly in the various other Legrand solutions: DLP trunking system, cabling accessories, cable management, etc.

**See pages 40 to 53**

Towards network convergence. The IP convergence products (IP telephony, IP remote monitoring, IP access control) can also be a part of the LCS<sup>2</sup> systems.

# System guaranteed performance of the Legrand systems

**Measurements of LCS<sup>2</sup> components and links, validated by independent laboratories 3 P Third Party Testing and ETL, have highlighted its triple performance.**

Performance of the transmission in cat. 6A, performance of the installation, performance of the maintenance.

## 1 Performance of the transmission in cat. 6A

For long distance, 10 Giga guarantees only slight signal loss for 100 m. For short distance, 10 Giga guarantees a good echo resistance for 15 m.

## 2 Performance of the installation

The values measured widely exceed the requirements of the ISO 11801 standard, Edition 2, amendment 2, thus providing a safety margin to conform to the most rigorous constraints of the installation.

## 3 Performance of maintenance

Being committed to deliver a durable LCS<sup>2</sup> system, Legrand gives a 20-year guarantee on its performance.

Note: all LCS<sup>2</sup> products are RoHS compliant.

# LCS<sup>2</sup> COPPER

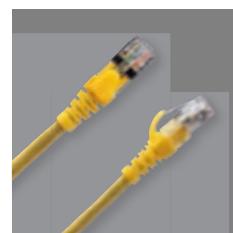

## A complete system up to 10 Gbits/s

**Connectors**  
See pages 16 to 17

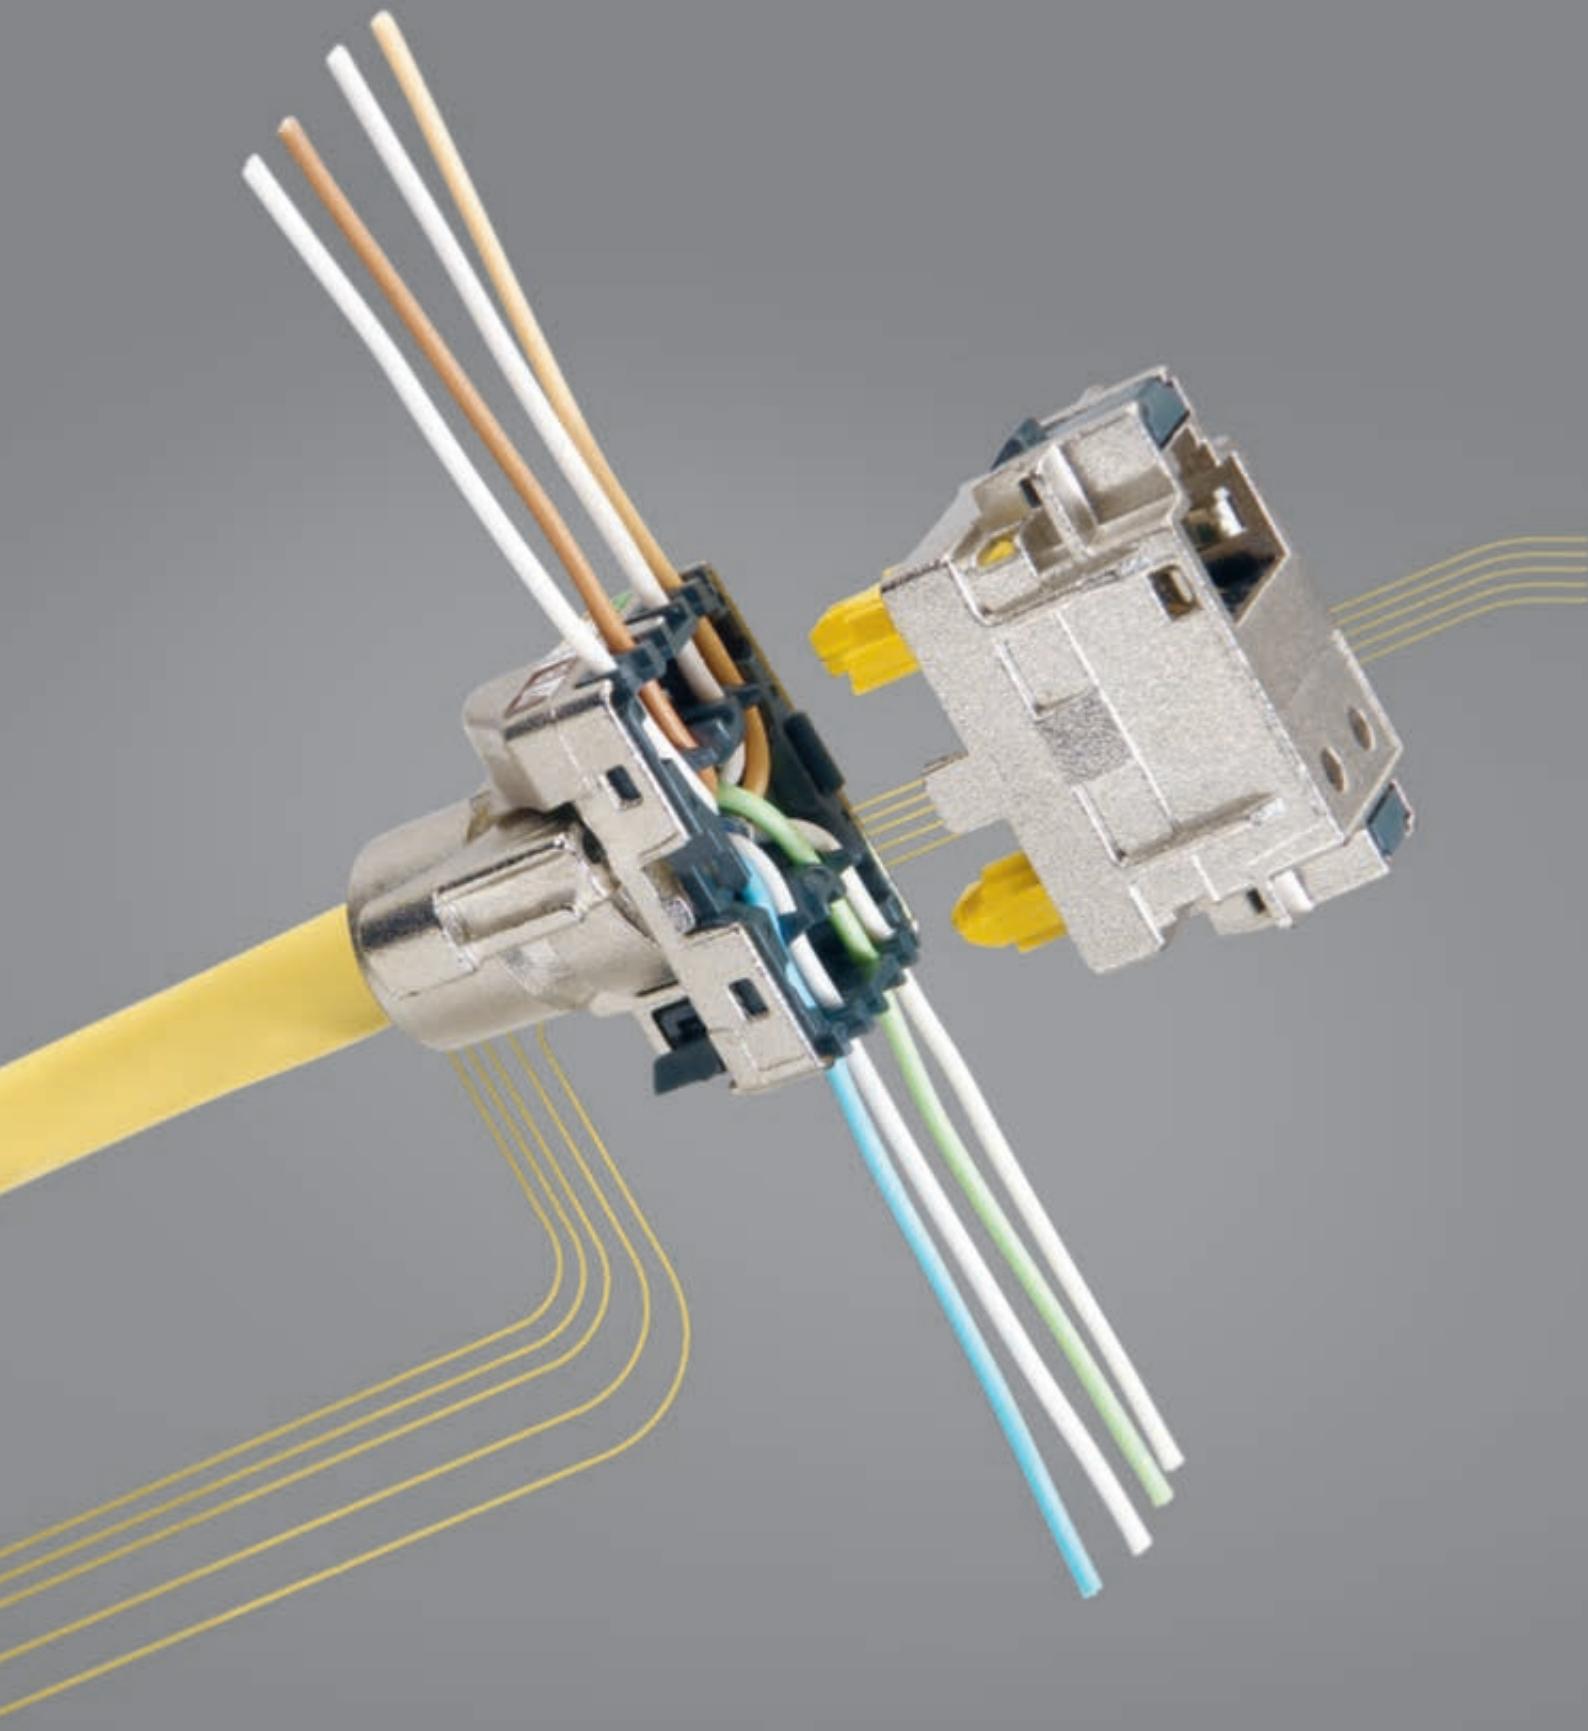

**Patch panels**  
See pages 18 to 19

**Patch cords and cables**  
See pages 20 to 21

# New LCS<sup>2</sup> connector

## Performance of the installation

**RJ 45 connector is the core element contributing to the performance of the LCS<sup>2</sup> system.**

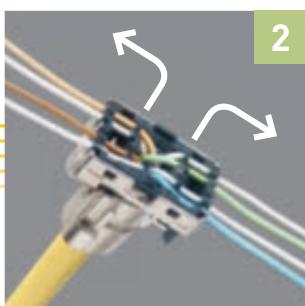

You can obtain a perfect connection within a few seconds guaranteeing an optimum performance of the link from the patch panel to the RJ 45 socket (see page 46).

### Insert the cable in the rear part

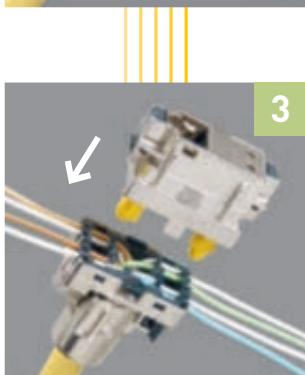

Visibility of the marking as per the TIA/EIA code.

Takes all cables currently available on the market:  
U/UTP, F/UTP and SF/UTP.

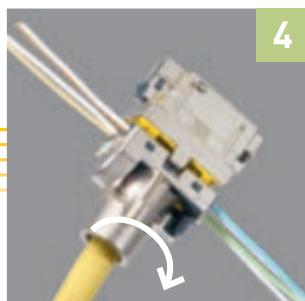

### Separate and insert the strands

Intuitively maintain 13 mm, no need to measure.

### Add the upper part of the connector

The tamperproof insert gives ease of movement.

### Turn to guarantee the connection

Simply turn to flatten the strands simultaneously. Cut them, and the connector is ready!

# LCS<sup>2</sup> Patch panels

## Performance of maintenance

**The design of the new LCS<sup>2</sup> patch panels optimises the mounting and maintenance.**

Maintaining the cables with cable guides, blocks of 6 RJ 45 connectors, clipping and unclipping each connector from the front panel.

### Better fixing by clamp

Cable maintained in its cable guide.

### Room for maintenance

Simple unclipping of LCS<sup>2</sup> connectors.

### Panels provided with quick-fixing system

Universal mounting any rack or cabinets.

**The new LCS<sup>2</sup> panels can also be fitted with:**

Telephone block

FC type video broadcast block

LC fibre optic cassette

# Legrand cables and cords coherence and performance

**To ensure total coherence of its LCS<sup>2</sup>  
cat. 6A, cat. 6 and cat. 5e systems,**

Legrand offers a range of 4 twisted pair cables in the four types: U/UTP, F/UTP, S/FTP, SF/UTP.

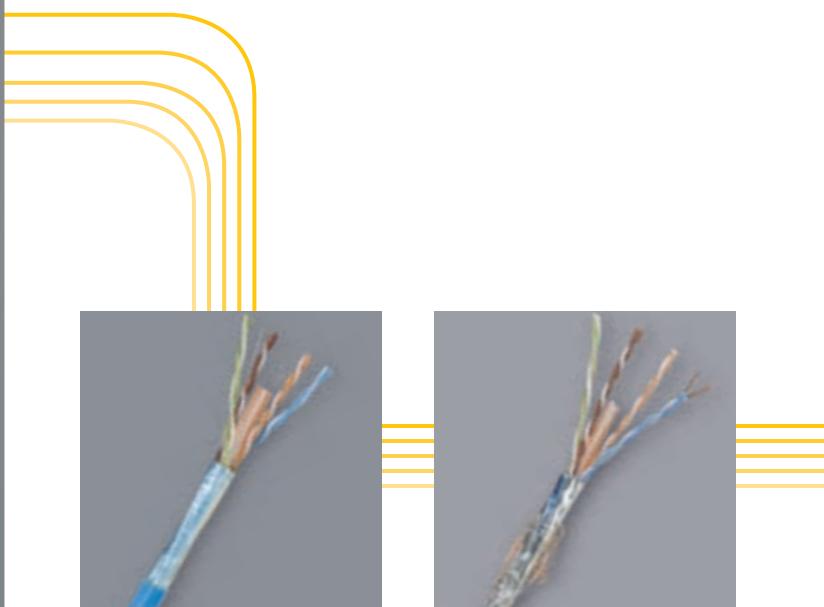

## ■ High-quality manufacturing

Manufactured to high quality standards, with thicker insulation to reduce the effects of crosstalk, and reduction of the twist pitch of the pairs: the quality of Legrand cables is suitable for the LCS<sup>2</sup> category 6A, category 6 and category 5e systems, ensuring high performance from the patch panel right through to the RJ 45 socket. What's more, Legrand offers its cables in 2 versions with sheaths suitable for different environments: LSZH and PVC. The 3P laboratory has certified all the Legrand cables to be compliant with the ISO IS 11 801, EN 50173-1 standards and TIA/EIA-568-C.2.

Ensure high-quality continuity: perfect plug connection and transmission performance...  
Available in several colours.

### Individually tested cords

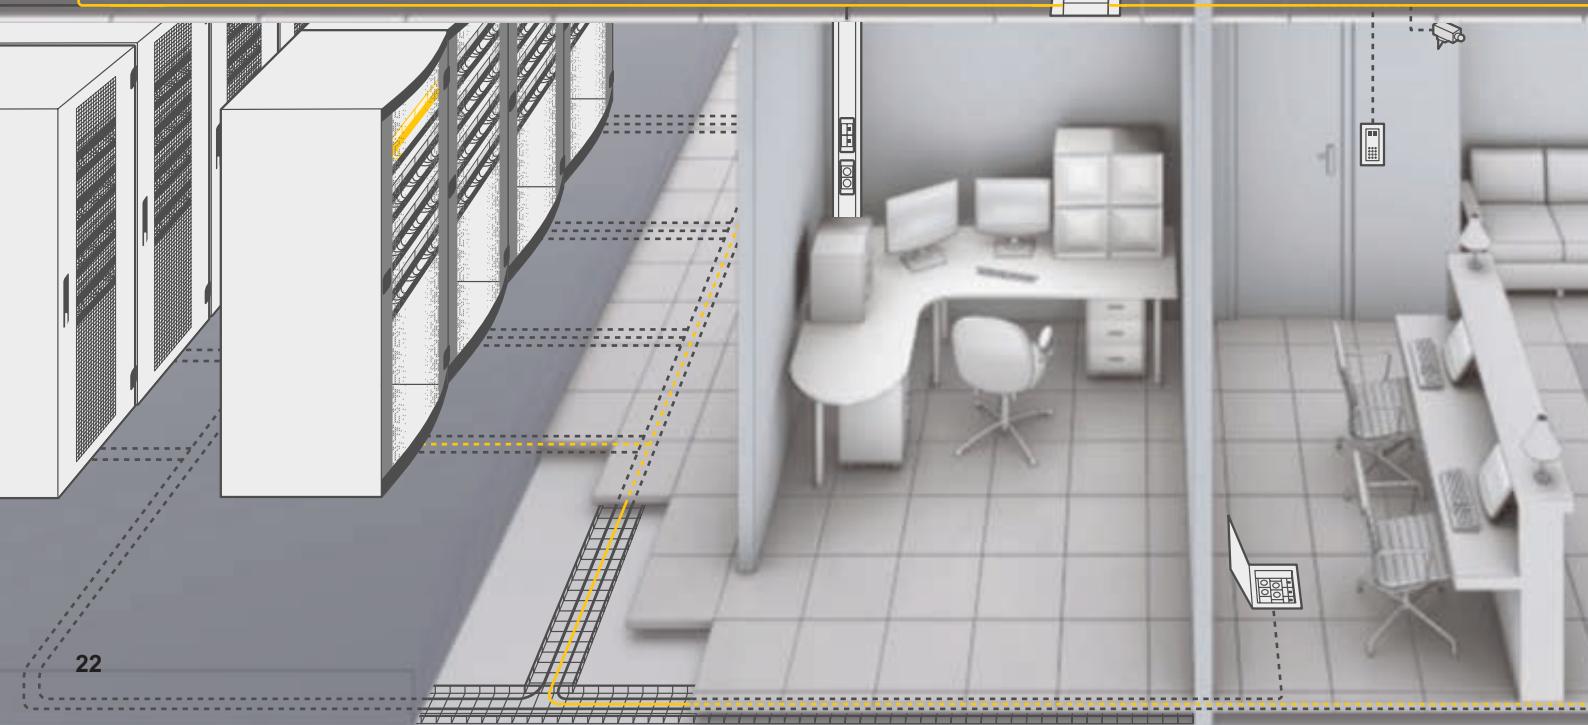

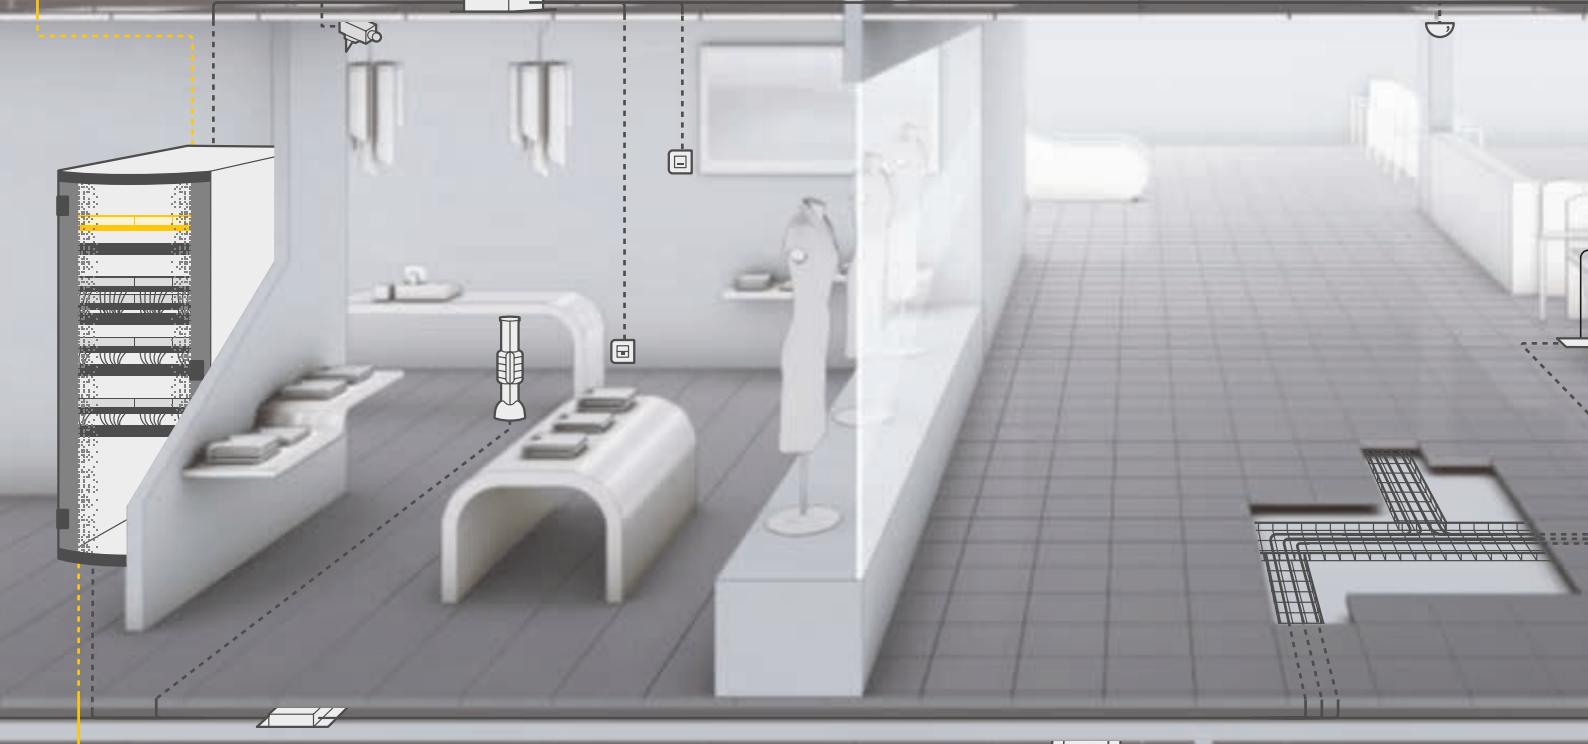

Legrand patch cords ensure high-quality continuity in a cabling system like other components. Legrand therefore takes the same care with the quality of its complete range of RJ 45 cords, which are certified by the 3P laboratory as compliant with the standards. [See catalogue pages](#)

### Tests on all parameters

Legrand cords are individually tested, both for continuity and transmission performance. All the parameters are measured: CR, ACR, NEXT, Return loss, Attenuation, etc. Cords which do not meet the criteria are rejected. These tests guarantee transmission performance from one end of the system to the other, with both class D and class E.

### Universal cords

Available in cat. 6A, cat. 6 and cat. 5e versions and in the three cabling types (U/UTP, F/UTP and SF/UTP). Legrand cords are available in different lengths, thus offering considerable flexibility of use.

# LCS<sup>2</sup> FIBRE OPTIC

## A simple and reliable option

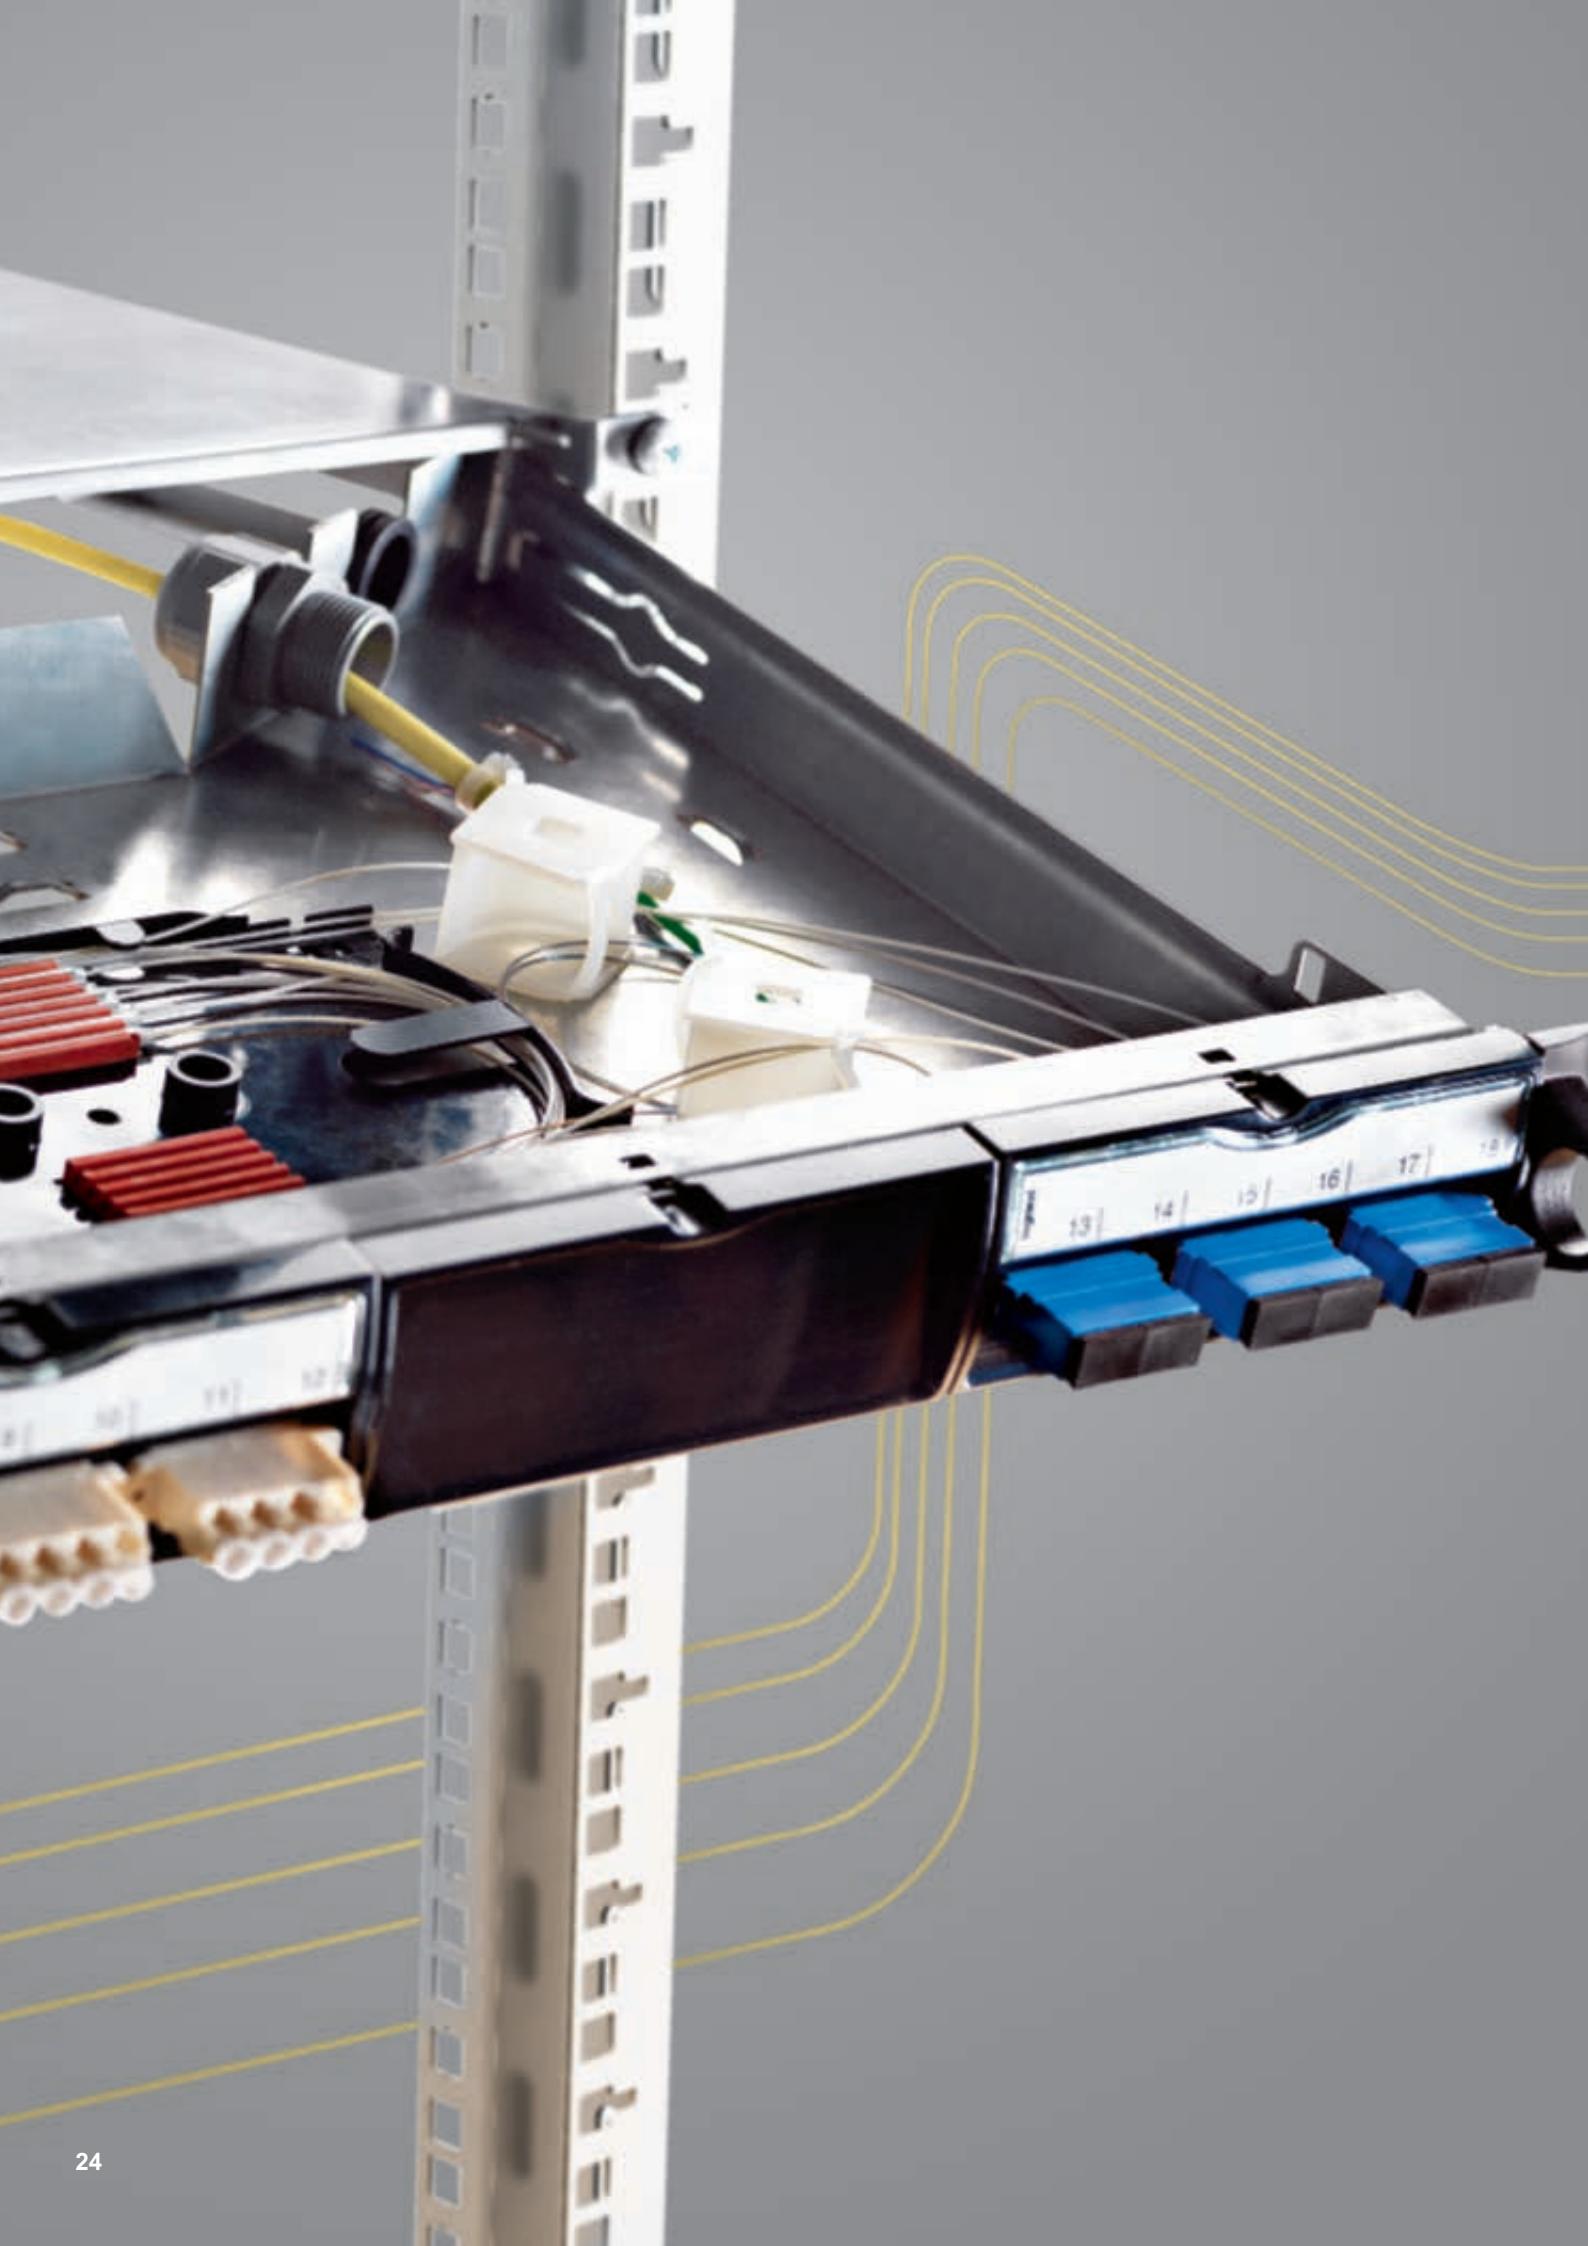

**Fibre optic drawers**  
See pages 24 to 25

**Connecting fibres**  
See pages 26 to 27

# LCS<sup>2</sup> Fibre optic drawer

## Complete accessibility and ease in coiling

The new LCS<sup>2</sup> Fibre optic drawer gives a better comfort in installation and maintenance.

Reinforcements facilitating the opening and closing, end stop inclined at 30° for complete accessibility, coiling the fibres ensured by the in-built coiling accessories...

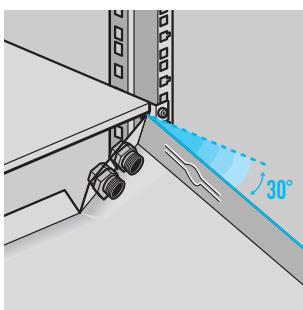

### 19'' Fibre optic drawer

Up to 4 fibre optic blocks can be fitted:  
from 24 fibres ST or SC, 48 fibres LC.  
Equipped with grip handles.  
Height: Modular 1U.

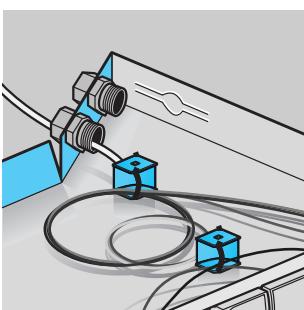

### 19'' High density fibre optic drawer

Up to 3 fibre optic blocks can be fitted:  
from 36 fibres ST or SC, 72 fibres LC.  
Equipped with grip handles.  
Height: Modular 1U.

### Total accessibility

End stop, inclined at 30°.

### Easier cable management.

Integrated coiling accessories.  
Rear in the form of a tail  
to facilitate connection of incoming  
cables.

Can take all  
fibre optic  
connector  
blocks

SC connector block  
19" High density fibre optic drawer

# Connecting fibres Legrand simplicity and performance

## Legrand solutions, including the rapid crimping connection process and

### pre-fitted fibre optic links on demand

have made a significant contribution to placing fibre optics within the reach of installers, particularly for links within buildings or between buildings, over distances of less than two kilometres.

#### ■ The basic steps

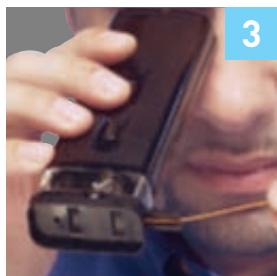

Preparation of the fibre :

Stripping

Cleaving

Inspection

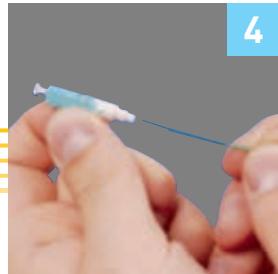

#### ■ Connection takes just 3 minutes with Legrand rapid connectors

The average time for making this connection is less than 3 minutes with rapid connectors Cat.Nos 0 326 52 to 0 326 61 incorporating a factory pre-polished fibre. After the operations to prepare the fibre, there is no longer any need to glue or polish, or to check the quality of the connection under a microscope! No oven, no drying. The factory pre-polished connectors ensure that the operation is simple and results in a high-quality connection.

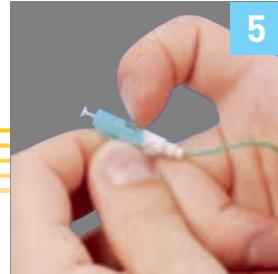

#### Tip

Consider leaving some fibres in reserve for future development of the installation. If you require 2 or 4 fibres now, install cables with 6 or 8, or if you require 6 to 8 fibres now, install cables with 10 to 12.

#### ■ Connection

Insert the fibre in the connector

Slide the switch on the connector - the splice is done

Slide the boot onto the connector

# Pre-fitted fibre optic

## Pre-fitted fibre optic links on demand: save time and cut risk to a minimum.

Order your own individual solution: pre-fitted and factory tested, it will save you time on site while ensuring a high level of link reliability. This minimises the risk of malfunction during the installation, thereby simplifying the acceptance test.

### ■ What is delivered?

Each link is supplied with a test report. Length stands from connector to connector, in metres. Links up to 50 m are conditioned in boxes (reel optional) and those over 50 m are supplied by reel. Connectors are protected by a sheath. Pulling ring included. Multimode 62.5/125 µm cable complies with OM1 category, 50/125 µm with OM2 or OM3 category and single mode with OS1 category.

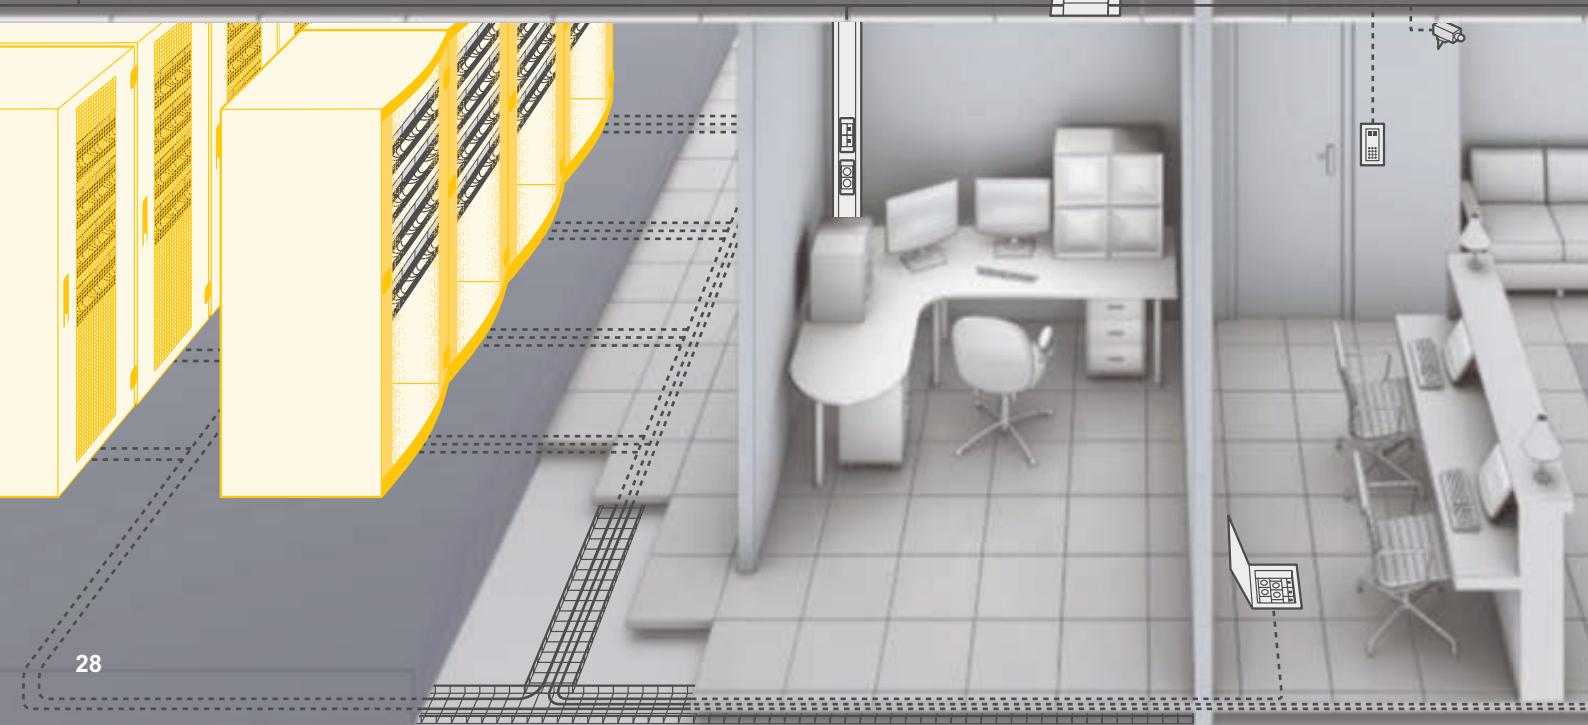

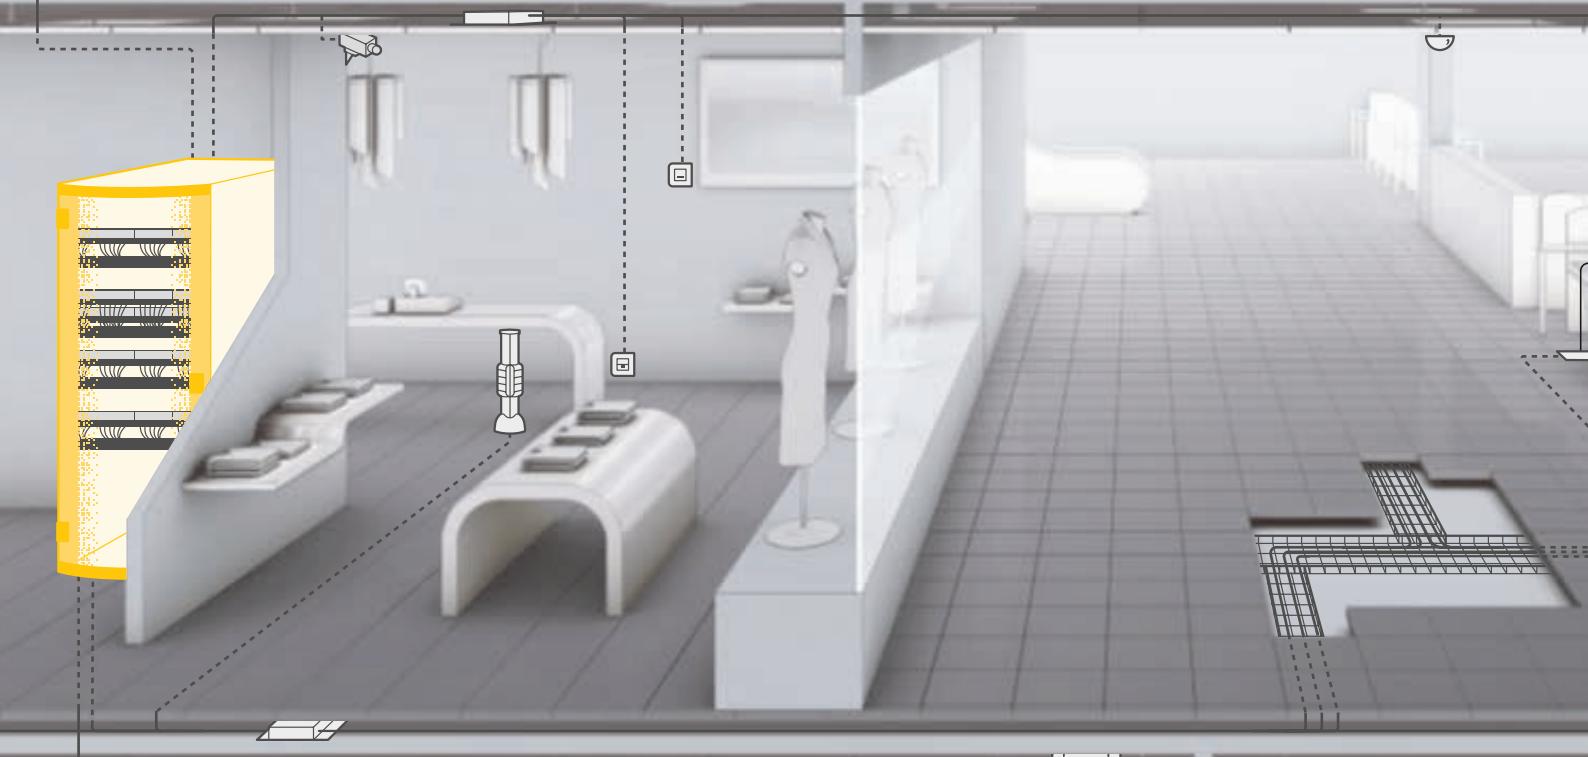

### ■ How to order

1. Once your preparatory installation work is done, determine the required length of cable.
2. Indicate the required type of fibre:
  - indoor, indoor/outdoor or outdoor
  - multimode 62.5/125 µm or 50/125 µm
  - or single mode 9/125 µm
  - number of cores (4, 6, 12, 24 for indoor applications, outdoor applications and indoor/outdoor applications)
3. Specify the type of connector: ST, SC or LC.
4. State your preferred form of delivery: box or reel.

For further  
information  
Please contact us!

# LCS<sup>2</sup> ENCLOSURES AND CABINETS

Easy installation  
and efficient  
maintenance

**Enclosures**  
See pages 30 to 33

**Racks**  
See pages 34 to 35

**Server enclosures**  
See pages 36 to 37

**Wall mounted  
cabinets**  
See pages 38 to 39

# 19'' LCS<sup>2</sup> enclosures

## Optimised management of cables and patch cords

**The design of the new LCS<sup>2</sup> enclosures facilitates managing the cables and patch cords.**

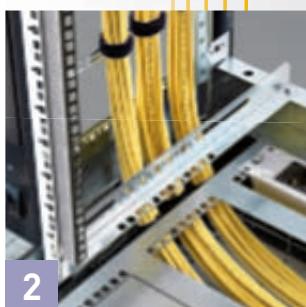

Easy association of a unit dedicated for cords, cable entry at the top made easy, new feedthrough panels for perfect organisation of patching...

1

### Enclosures

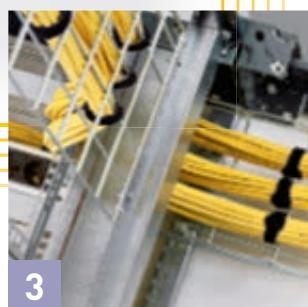

The structure allows easy cable entry at the top and bottom of the enclosure. In the case of reduced room access space the structure can be completely dismantled.

2

### Optimised cable management

The enclosures are offering lots of space besides the 19" uprights to guide and fix large quantities of cables.

3

### Linking interface

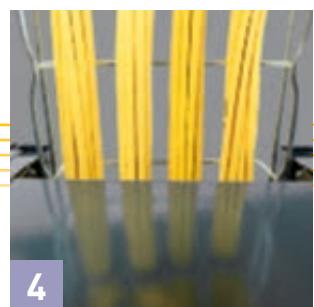

Protects the cables and guarantees the bending radius between enclosure and cable trunking.

5

### Respecting of the bending radius

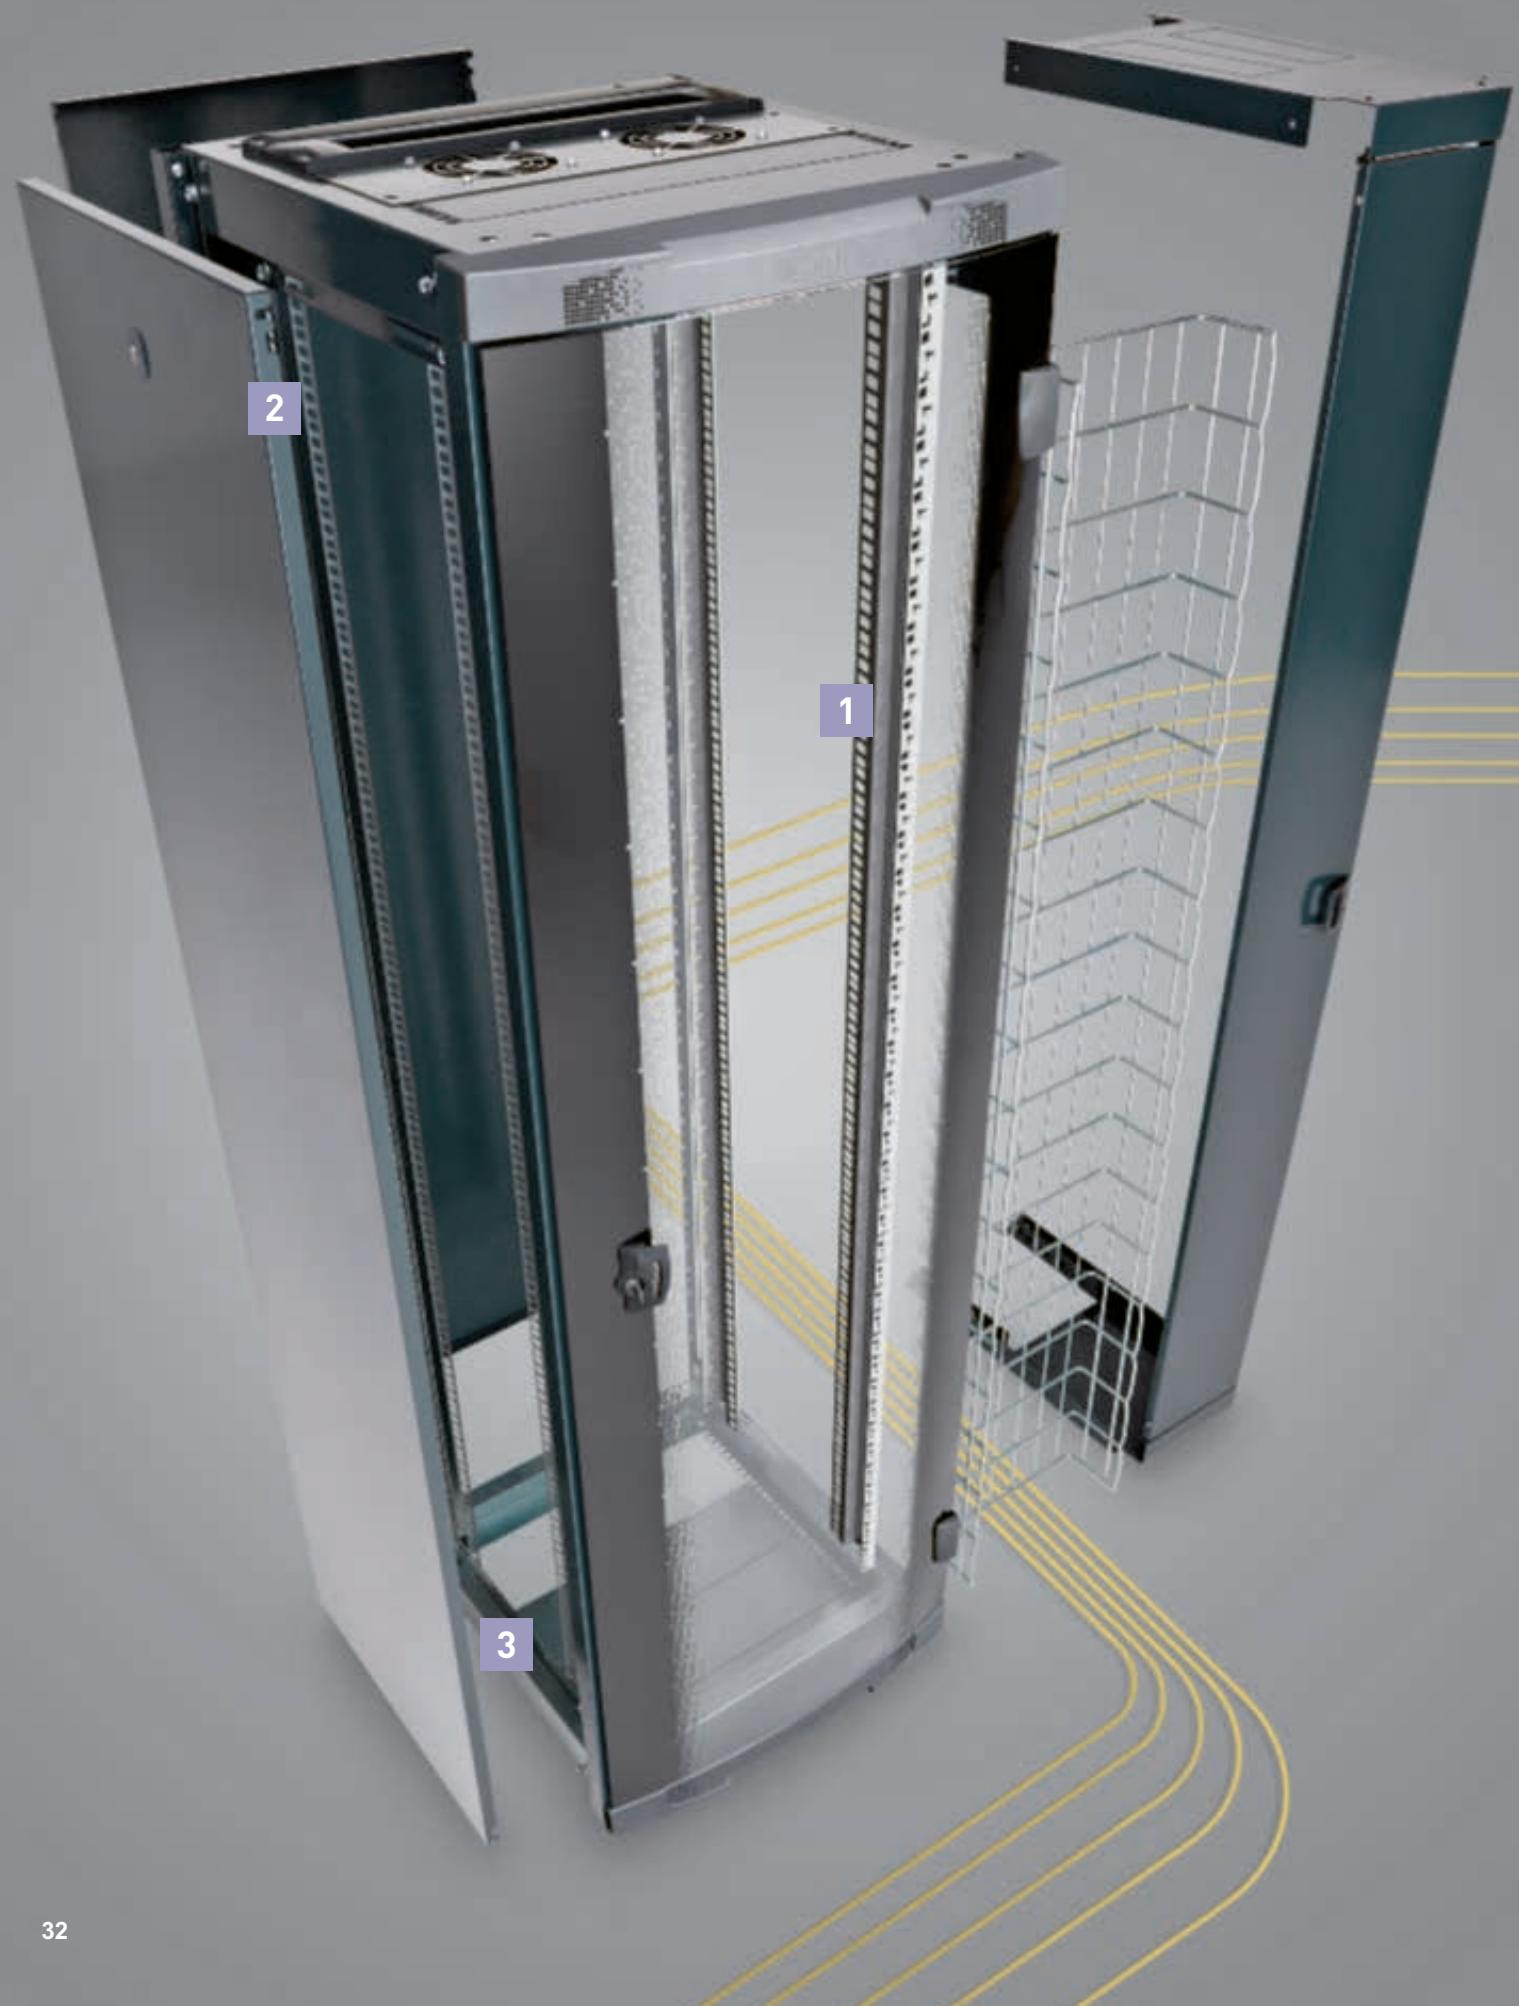

Cable management panels with rings to guide and protect the patch cords.

4

### Easy cable entry

Enclosure and cable management unit are equipped with pre-cuts (19") that accept cable feedthrough panels.

# 19" LCS<sup>2</sup> enclosures simplified assembly

**The new LCS<sup>2</sup> enclosures can be very easily assembled and dismantled.**

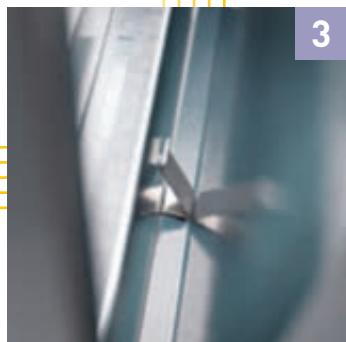

A considerable time-saving on the sites, complete accessibility thanks to the removable side and rear panels and a structure that can be entirely dismantled.

**Easy installation**  
Dual marking of 19" uprights.

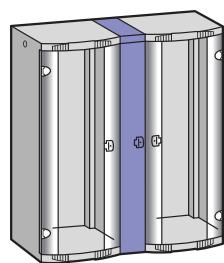

**Total accessibility**  
A structure that can be completely dismantled.

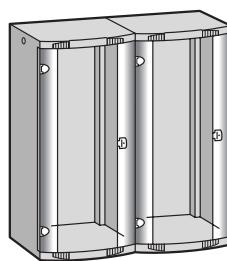

**Automatic grounding clip**  
Guarantee of grounding for the side and rear panels with the automatic grounding clip.

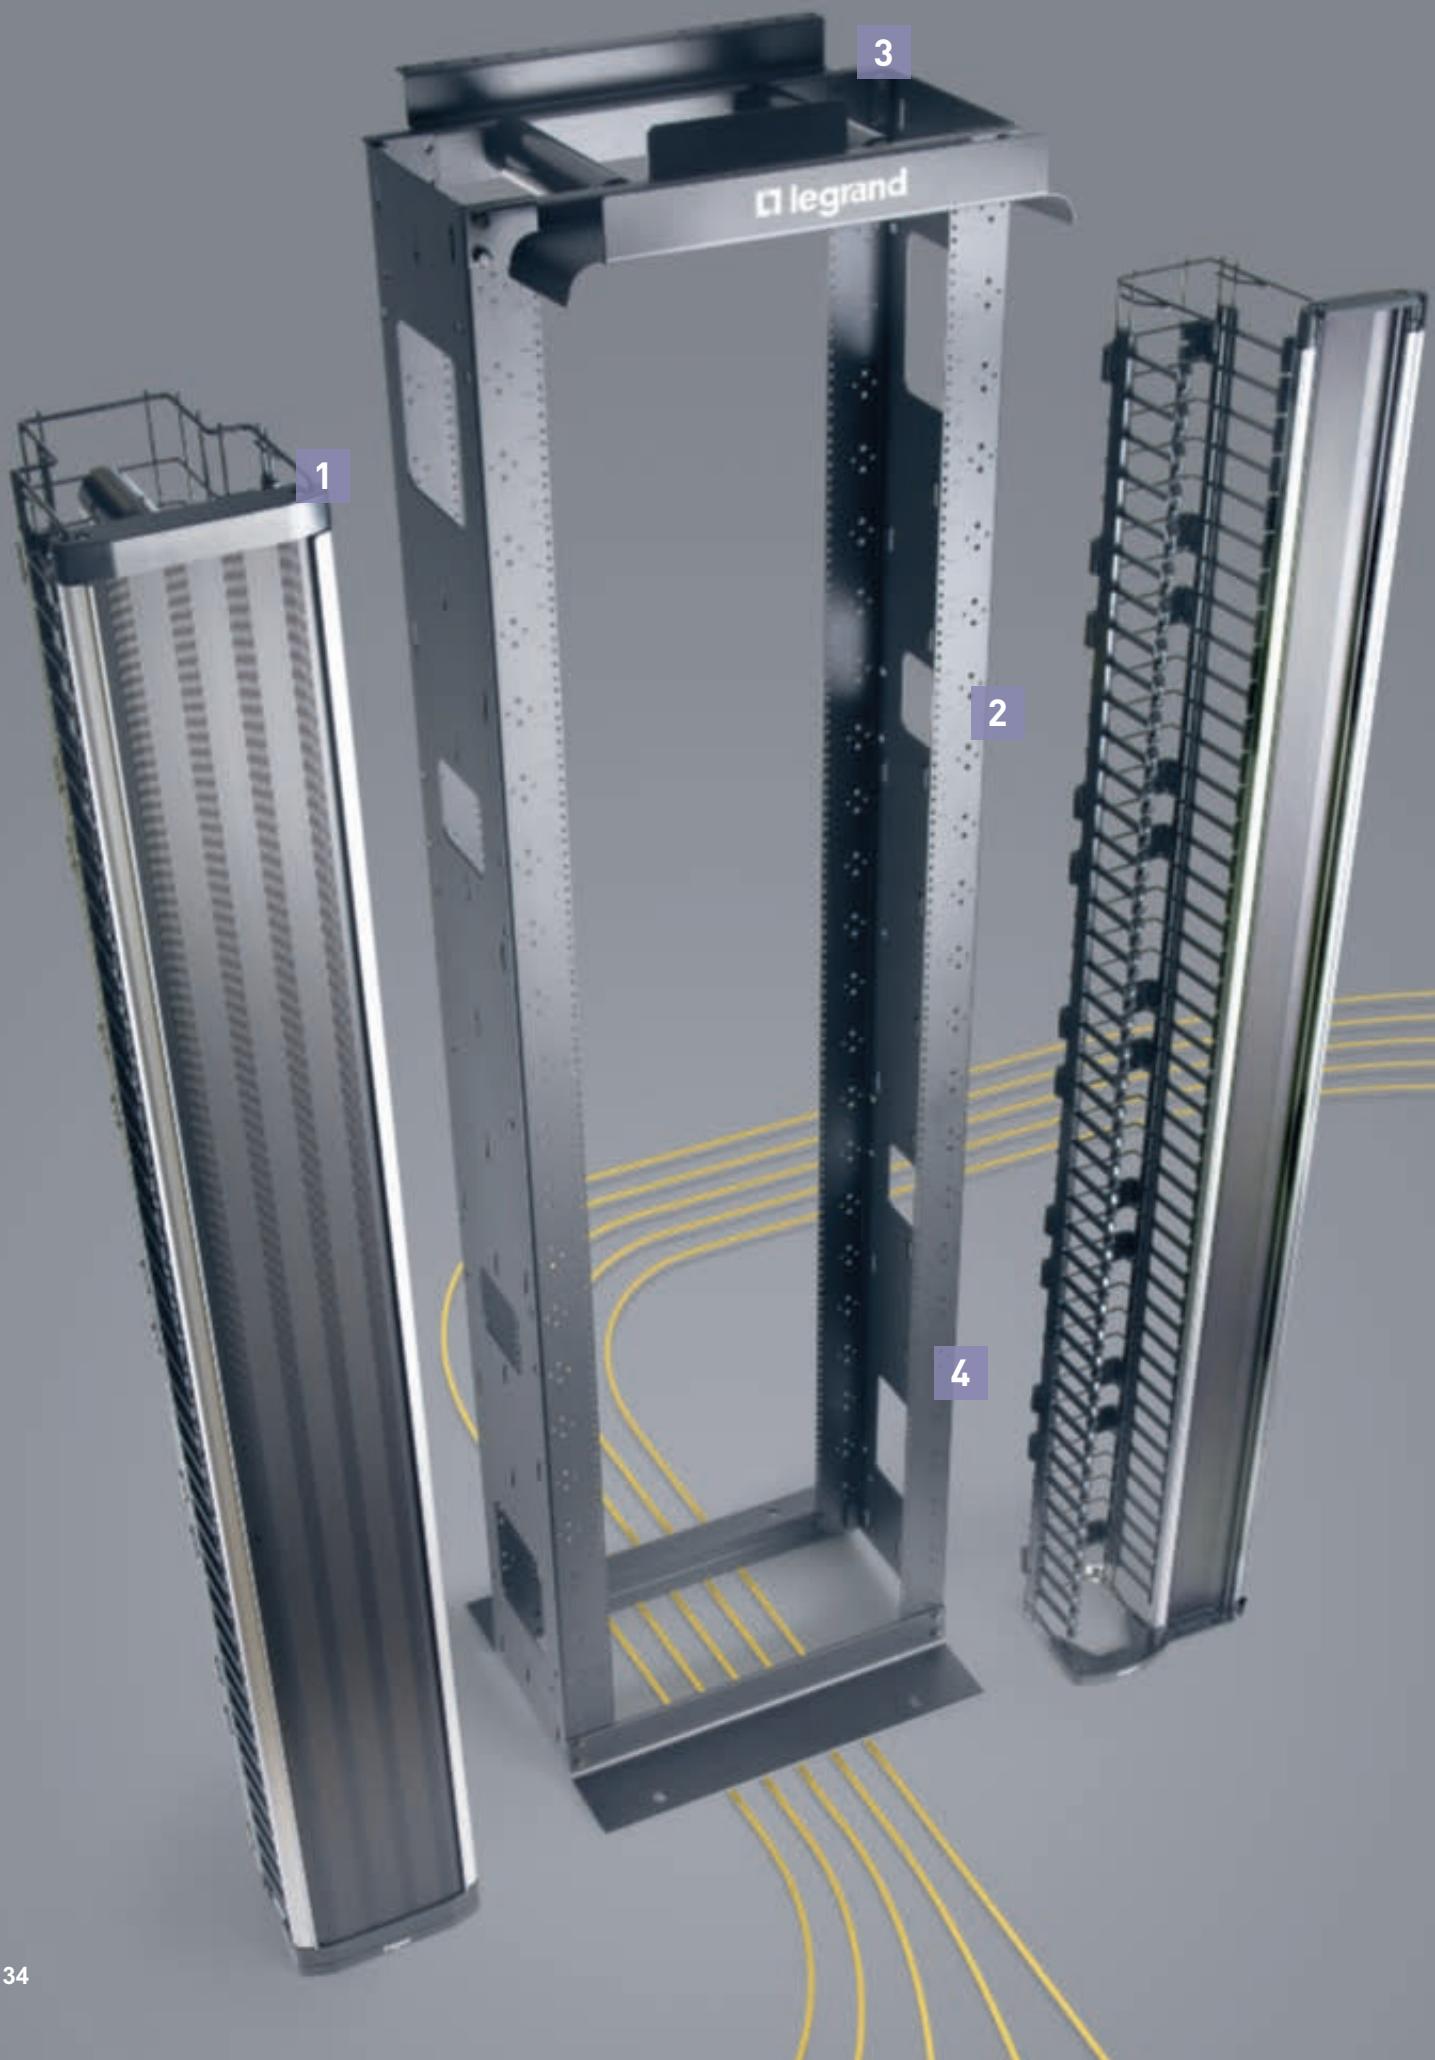

**Combinations that answer various needs**

Two 600-mm-wide enclosures with a cabling unit.

Two 800-mm-wide enclosures side by side.

# LCS<sup>2</sup> 19'' High Density racks Advanced cable management

The new LCS<sup>2</sup> racks offer full cable management for optimizing your network performance.

In addition to the support strength, the LCS<sup>2</sup> cable management systems provide flexibility from the system design stage through to any future extensions.

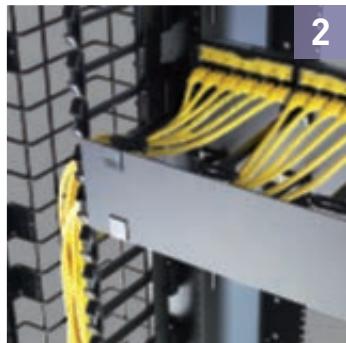

## Innovative cord management cages

With individual conduit for each rack unit and door that opens in both directions.

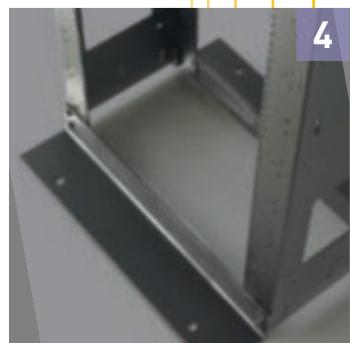

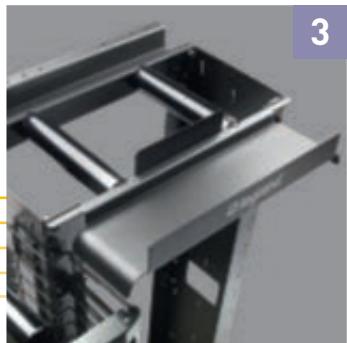

## Cord management panels with cover

With conduits for vertical and horizontal cord organization.

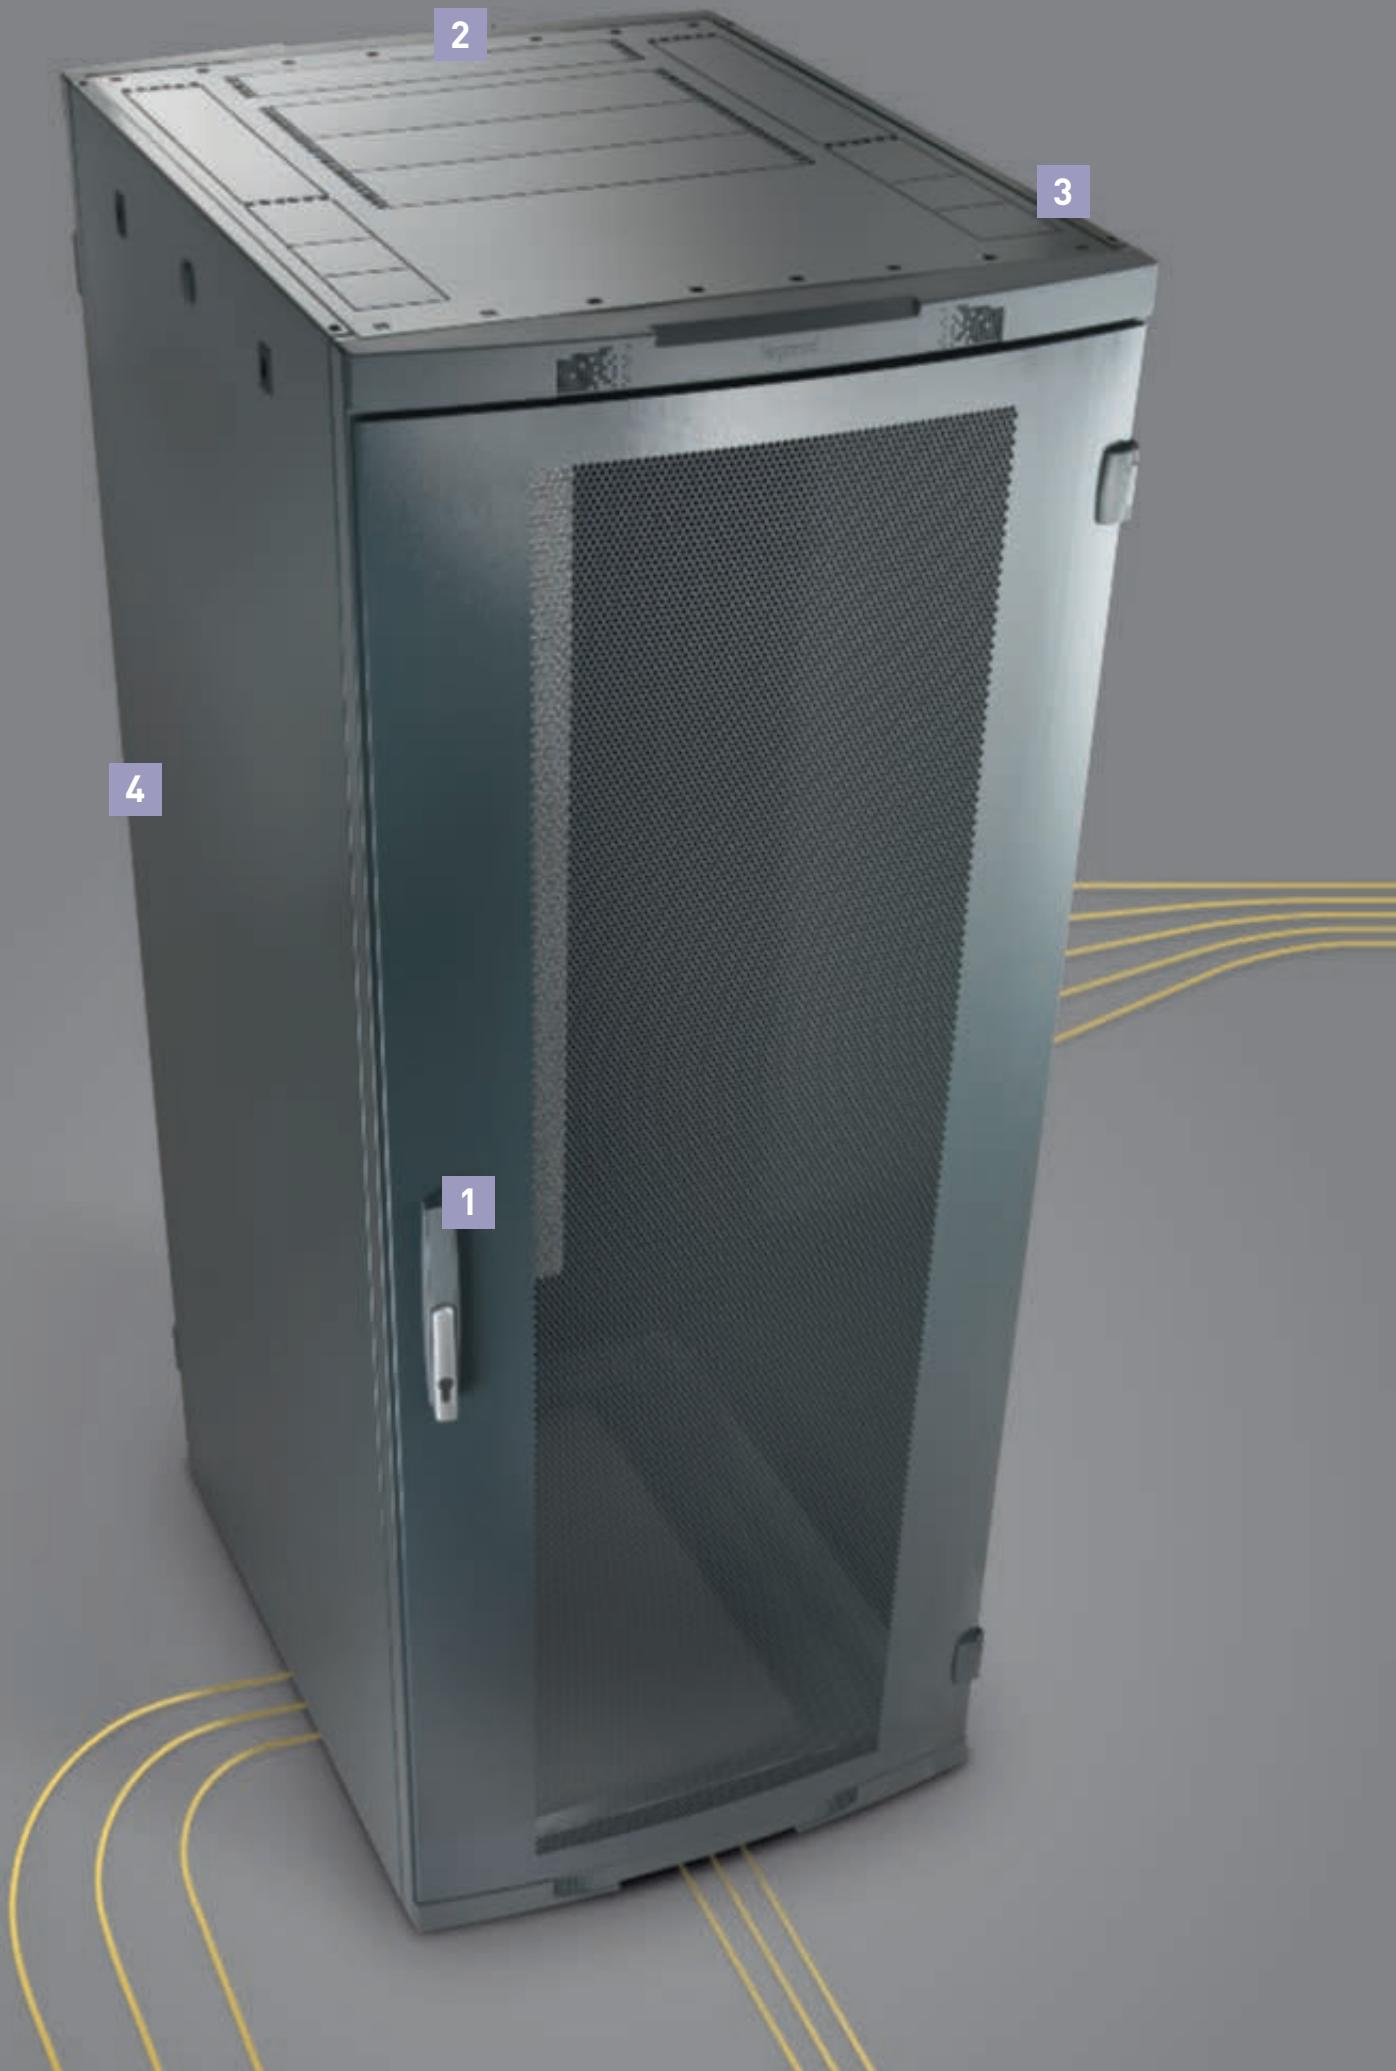

## Integrated upper trunking

For compliance with the bending radius and organized running of cords.

## Light stainless-steel aluminium construction

With black powder finish, resistant to marks and scratches.

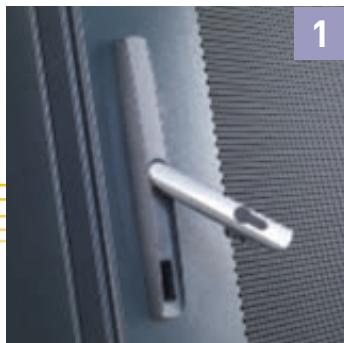

# LCS<sup>2</sup> 19"

## Server enclosures

### Complete accessibility

The new LCS<sup>2</sup> server enclosures are designed for complete accessibility.

Complete accessibility not only via the doors and panels, but also thanks to the rooftop pre-cuts and opening of the enclosure below.

**Doors and panels with keyless lock system**

- front door with handle
- perforated front and rear doors - 80% microperforation.

**Cable entry**

- 19" High pre-cuts
- open bottom.

**Cable ducting**

Support with screwless tray fixing - Cablofil.

**Power Distribution Unit**

- different international outlets standards to supply energy to your active devices
- 19" and vertical PDU (direct mounting)

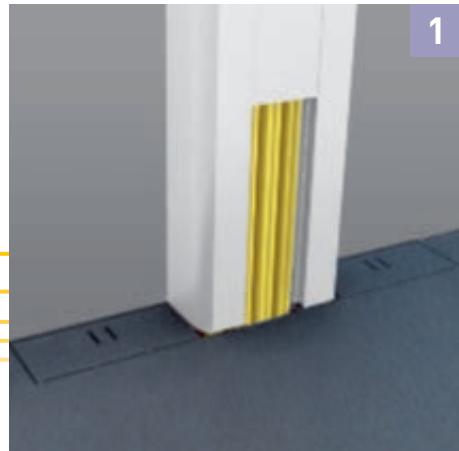

# 19''LCS<sup>2</sup> cabinets

## Easy access, high-quality finish

The new LCS<sup>2</sup> wall-mounting cabinets can be fitted anywhere where maintaining aesthetic quality is very important.

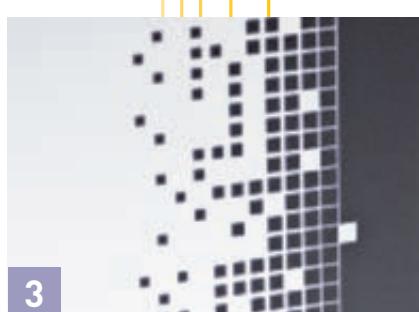

The removable side panels and flexible cable entries (in the fixed cabinets) facilitate access for quick installation and easy maintenance.

**Flexible cable entries**  
In DLP trunking system format.

### Total accessibility

Also available with pivoting body to enable easy access at the back.  
Removable side panels on all LCS<sup>2</sup> cabinets.

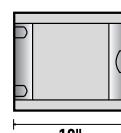

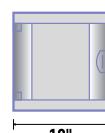

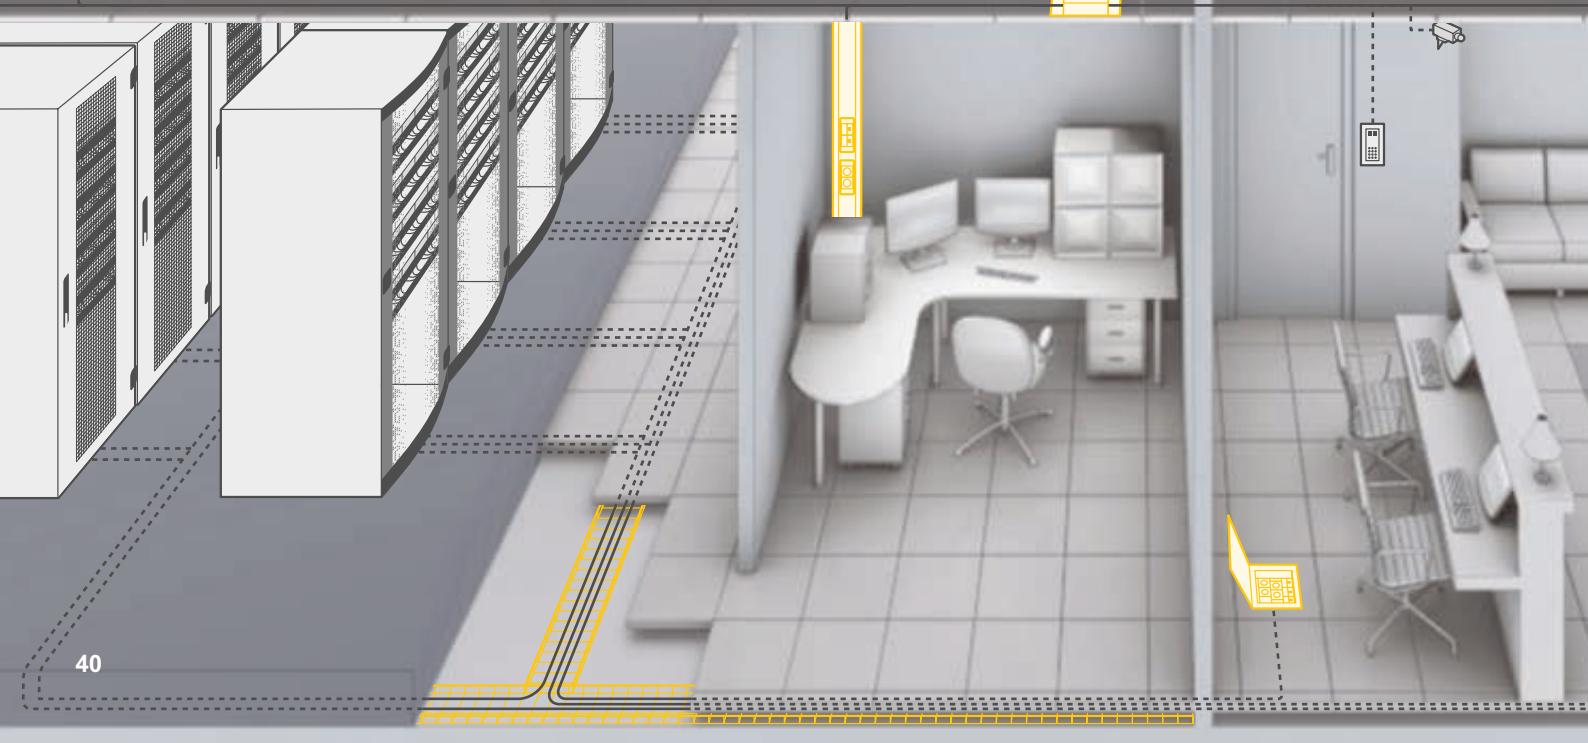

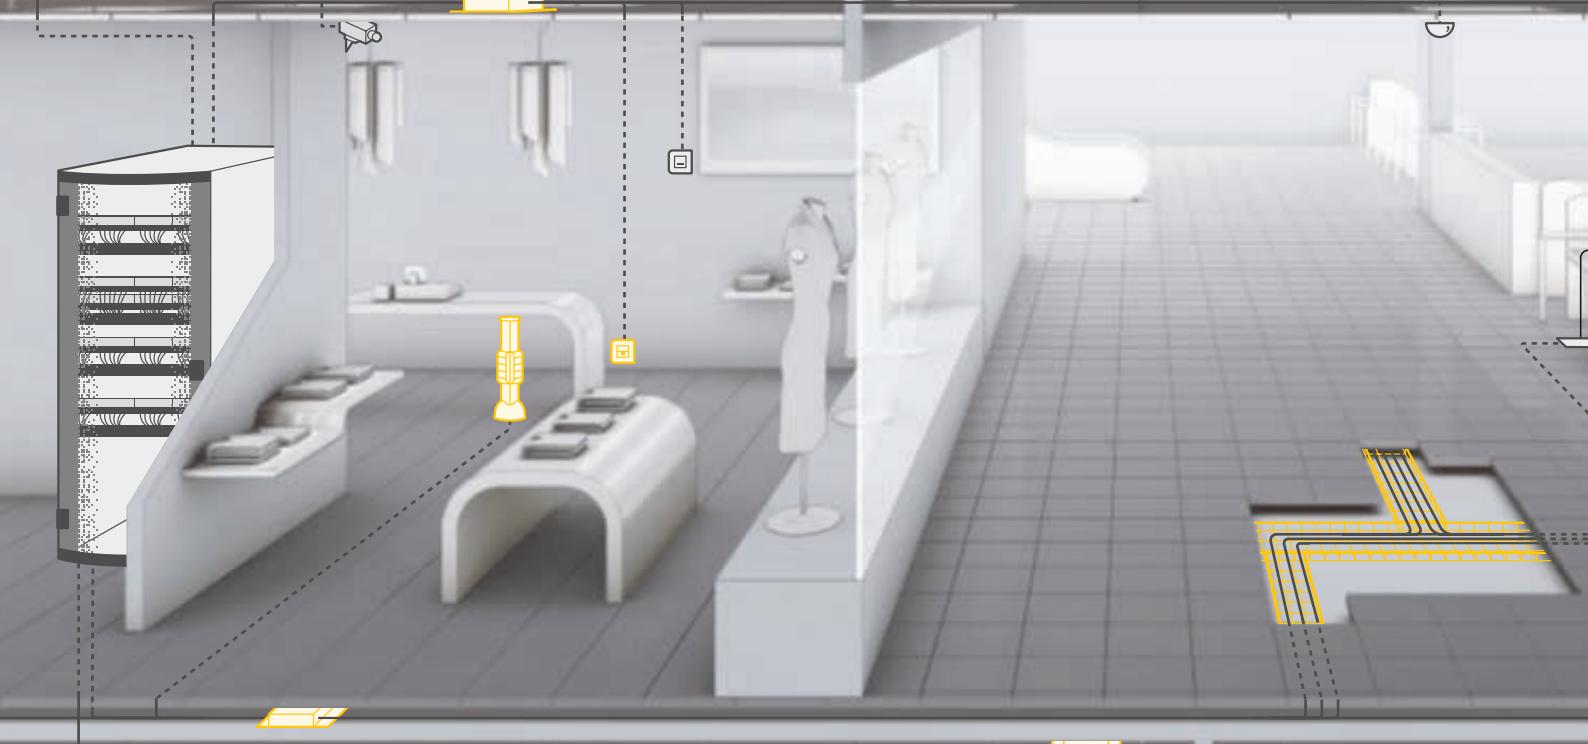

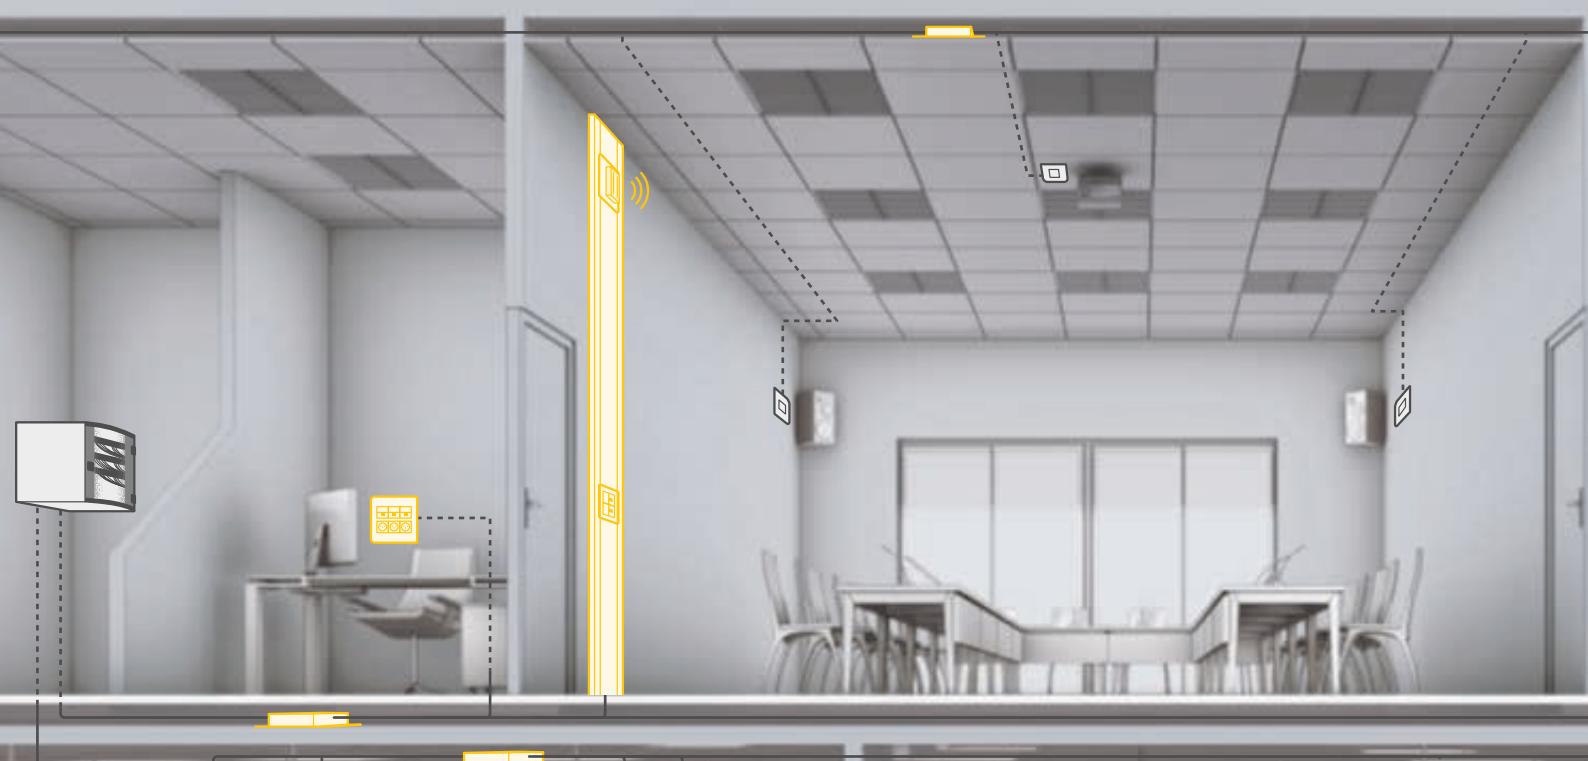

**High-quality finish**  
Curved door, screen-printed glass.

Also available  
in 10" version

Compact:  
LCS<sup>2</sup> cabinet for small businesses.

# LCS<sup>2</sup> WORKSTATION

## The network at your hand

**Zone distribution  
boxes**

See pages 42 to 43

**Installation  
supports**

See pages 44 to 45

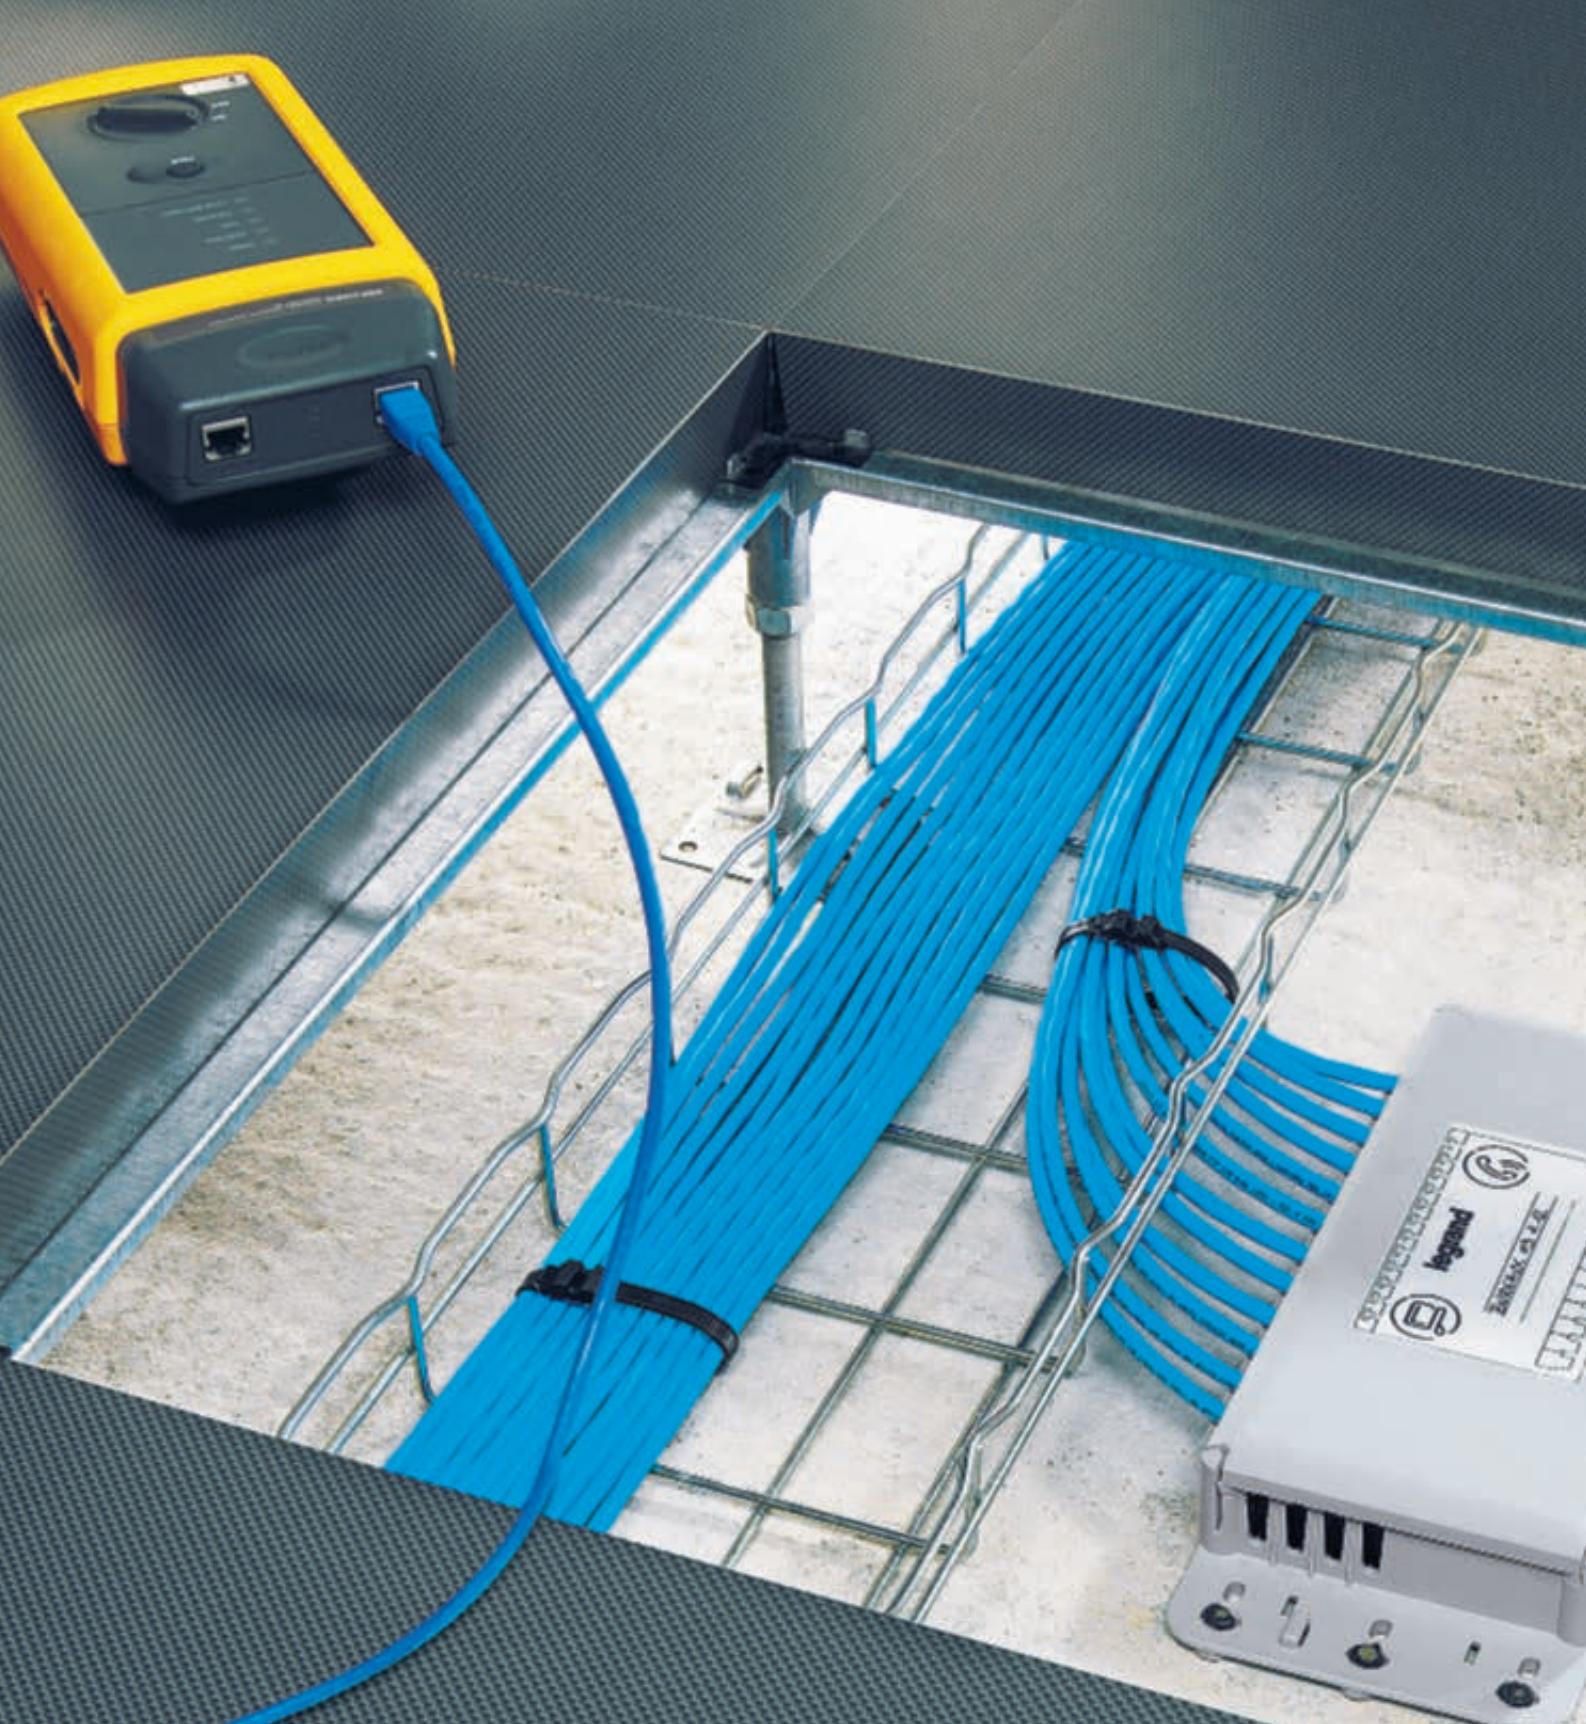

**RJ 45 Sockets**

See pages 46 to 47

**Wi-Fi**

See pages 48 to 49

# Zone distribution boxes of LCS<sup>2</sup> consolidate and redistribute with complete ease

**2 blocks of 6 connectors can be fitted to connect up to 12 RJ 45 sockets**  
Distribution close to the installation supports (see next page).

**With the new LCS<sup>2</sup> zone distribution boxes connected to the Mosaic or Arteor feedthrough sockets, the result is complete flexibility.**

The connections close to the workstation are centralised, copper and fibre optic are in a single box, etc. and the LCS<sup>2</sup> performances are guaranteed.

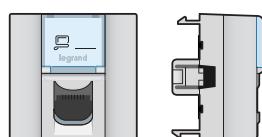

**Fibre optic/RJ 45 union**  
Copper and fibre are placed side by side in the same box.

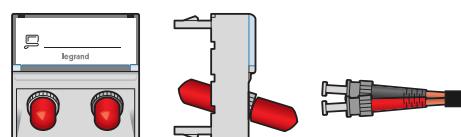

**Coil rack**  
For fibre optic.

**LCS<sup>2</sup> Mosaic or Arteor feedthrough sockets:**  
Quick and reliable connection, installation on all supports

RJ 45 socket with copper feedthrough for RJ 45 – RJ 45 cord.

2 x ST fibre optic feedthrough socket for optical patch cord.

# Installation support cable management systems

## Network within reach.

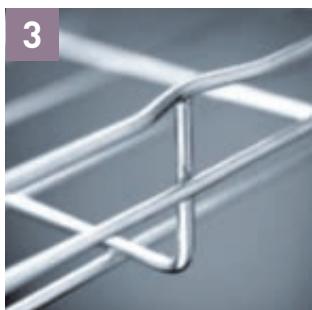

On the wall with trunking, on the ceiling with columns, on the ground with floor boxes and desktop multi-outlet extensions or nearby with blocks and mini-columns. They are suitable for all work space configurations.

**Mini-columns**

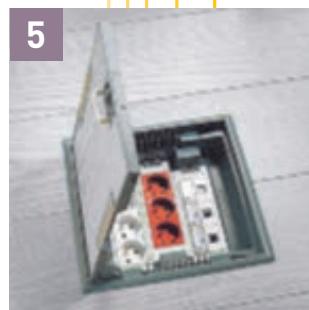

**Columns**

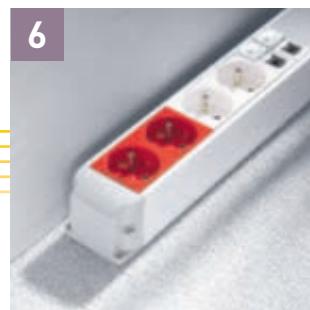

**Cablofil**

**Snap-on trunking**

**Floor boxes**

**Desktop multi-outlet extensions**

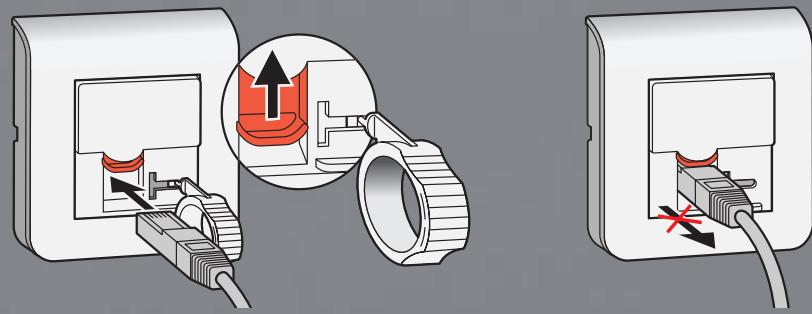

**Meeting room modules**

**Office modules**

## End-to-end solutions:

Legrand cable management systems allow distribution of VDI cables and power cables from the point of entry to the workstation.

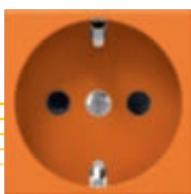

Mosaic RJ 45 socket  
with controlled access

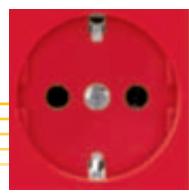

# Organisation and safety with the new Mosaic sockets

In the technical room, in a false ceiling or in the floor boxes and desktop multi-outlet extensions, it is necessary to identify the special networks at a single glance. Video surveillance, access control, adjusting the air conditioning, sensitive devices, etc. The Mosaic LCS<sup>2</sup> sockets have a coloured cover, consistent with high-current sockets.

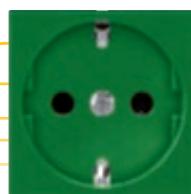

**Identify the protected supply networks**  
to ensure the protection of sensitive applications (for example: medical equipment).

**Identify and restrict access to the uninterrupted power supply networks**  
to ensure continuous power supply to computer equipment.

**Structure the special supply networks** to isolate the specific equipment in the building.

**Structure and protect the networks** by insulating the sensitive applications.

**Identify the sensitive information networks** and control their access using a cover that can be unlocked using a key.

**Structure the remote-supply networks** (PoE injector) to use telephone, video applications on IP, etc.

**RJ 45 Sockets with high standards of Legrand accessories**

Mosaic  
White or aluminium

Arteor  
Flow of energies

Céline  
Pleasing to the eyes

# Wi-Fi that can be installed just like RJ 45 sockets

**Wi-Fi access points can be fitted anywhere where unrestricted access to the computer network is required.** They can be fitted just like the RJ 45 sockets and on any supports. The stability of performance and the durability of products are guaranteed (see page 53).

## Wi-Fi access points: essential mobility...

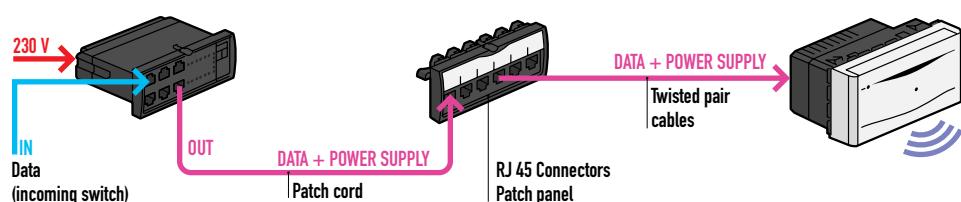

- In an environment where multiple Wi-Fi networks operate together, to optimise the available speed everywhere in the building (in compliance with 802.11 a + b/g and 802. 11 n standards).
- In reception areas and passages, to provide network access anywhere in the building (in compliance with the 802.11 b/g and 802. 11 n standards).
- In shared work areas, to connect a computer permanently and provide a wireless connection to temporary users (in compliance with the 802.11 a + b/g and 802. 11 n standards).

## The Wi-Fi access points can be mounted on any support:

Columns, mini-columns, snap-on trunking, floor boxes, etc., mural or on Cablofil.

**LCS<sup>2</sup> PoE injector:**  
Power supply to  
Wi-Fi access  
points from the  
patch panels

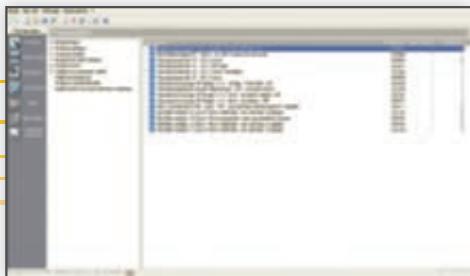

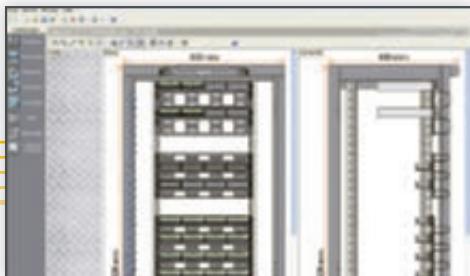

# New LCS Pro<sup>2</sup> software

## Your LCS<sup>2</sup> enclosure in a few clicks

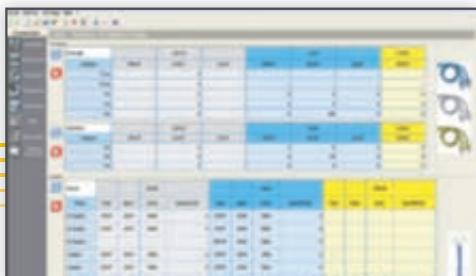

With the new LCS Pro<sup>2</sup> software,  
you can now very easily and quickly select  
your products, view your enclosure, etc.

**Automatic determination**  
of catalogue numbers by selecting  
the features and options.

**Visual display of the installation**  
of the enclosure, modifications possible.

**Easy management of studies**  
Technical records, purchase  
orders, document printing.

# Structured cabling classes: A top-level training at Innoval

**Being in close contact with engineers at the cutting edge of technological advances, Legrand trainers offer you practical classes in workshops.**

These are experienced people who understand your business and speak your language. We offer you very useful and practical classes.

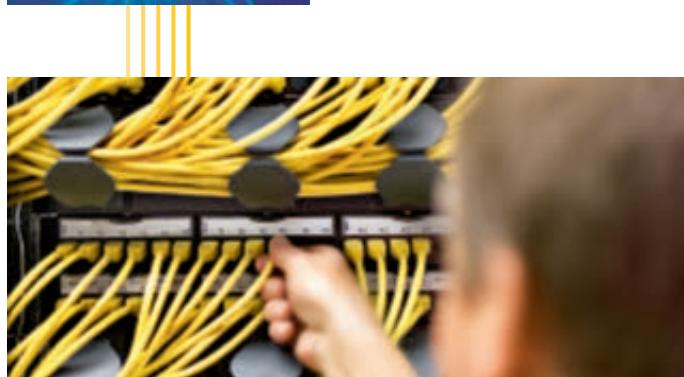

## Comprehensive classes

- Copper installation: essential for commercial sites
- Optical fibre: use and testing of an installation
- Copper: use and testing of an installation.

## Classes to understand different methods

of using an optical backbone and of connecting and testing the optical links, as per the standards in force.

**Classes to convert the telephone** and computer network needs of your clients into complete and upgradeable solutions, and cabling them as per the standards in force.

# Assurance of performance

## Two guarantees to ensure the durability of your installations

The 20-year performance guarantee:

Legrand offers the installer the guarantee of continuity of performance levels of an LCS<sup>2</sup> cat. 6A, LCS<sup>2</sup> cat. 6 or LCS<sup>2</sup> cat. 5e system on link or channel over time.

The 20-year components guarantee: Legrand offers the installer the possibility of extending the usual guarantee from 2 years to 20 years on all products used in link or channel.

### - The components guarantee of the LCS<sup>2</sup> cat. 6A, LCS<sup>2</sup>

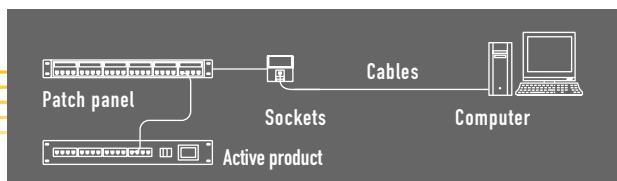

**cat. 6 or LCS<sup>2</sup> cat. 5e systems:** Legrand offers an extended guarantee on the components of the LCS<sup>2</sup> cat. 6A, LCS<sup>2</sup> cat. 6 or LCS<sup>2</sup> cat. 5e systems. 20 years for the components of channel or link, i.e. patch panels, RJ 45 sockets, cables and cords.

The contractual 2-year guarantee on these products is thus extended to 20 years.

### - The channel performance guarantee:

A channel is defined by the standards as being an assembly consisting of the following components: patch cord, patch panel, cable, RJ 45 socket, user cord. During acceptance testing, the performance of the channel is measured over a maximum length of 100 m. It must remain constant over time.

## The performance of an installation must stand the test of time.

This is why Legrand guarantees the performance and the components of its LCS<sup>2</sup> cat. 6A, cat. 6 and cat. 5e systems over the entire channel or link for 20 years.

## Conditions of the 20-year Performance Guarantee

As with any guarantee contract, certain conditions must be met in order to qualify for the Legrand 20-year Performance Guarantee. These conditions are naturally within the capabilities of any company specialised in the installation of structured cabling systems.

The main conditions are given below (extracts from the 20-year Performance Guarantee issued by Legrand).

The installer has stored the components in storage conditions suitable for their type.

The installation has been built in strict compliance with good practice and abiding by all the conditions listed below.

All the components used in the cabling system must be Legrand LCS<sup>2</sup> cat. 6A, LCS<sup>2</sup> cat. 6 or LCS<sup>2</sup> cat. 5e Cabling Systems components.

All the patch cords used must be original Legrand products.

The max. length of a cord must be 5 m.

The installation must be built in accordance with the recommendations defined in installation standards EN 50174, EN 55022 and UTE C 15-900 in force at the time of issue of the guarantee.

Prior to the signature of the guarantee contract, Legrand will check that the installation acceptance test data comply with the values specified in the standard.

The installer must submit the following 4 documents to Legrand:

- The installation acceptance test for the link or the channel
- The "14 key points of a high performance installation" form, ticked and signed as agreement on its part of having complied with the 14 points
- A full list of the products installed
- An installation diagram of the patch cabinets and the RJ 45 sockets.

Any subsequent modifications or extensions must comply with the conditions listed above.

# LCS<sup>2</sup> performance from technical room to workstation

The new LCS<sup>2</sup> system integrates perfectly in various other Legrand solutions:

DLP trunking system, cabling accessories, cable management, etc.

## DISCOVER A COMPLETE SOLUTION

### A perfect connection from the cabinet to the socket

- Cabinets: 19" or 10" wall-mounting cabinets, freestanding and server freestanding cabinets for an easy installation and efficient maintenance
- Cat. 6A, cat. 6 and cat. 5e: patch panels, units of connectors, RJ 45 sockets, cables and cords

▶▶▶ Wall-cabinets and freestanding cabinets, p. 92 to 101

▶▶▶ Cables and cords, p. 63, 67, 72, 77, 83

▶▶▶ Patch panels and units, p. 62, 66, 72

▶▶▶ Sockets, p. 64, 65, 68, 69, 73, 79

### Additional components for performance and extension

- Fibre optic: simple and reliable option
- Area distribution boxes: for consolidation and redistribution
- Wi-Fi access points: For fitting just like RJ 45 sockets and on other supports

▶▶▶ Fibre optic, p. 77 to 83

▶▶▶ Area distribution boxes, p. 70

▶▶▶ Wi-Fi access points, p. 84-85

OTHER EQUIPMENT FOR 19" LCS <sup>2</sup> FREESTANDING CABINETS AND SERVER FREESTANDING CABINETS (p. 94, 97, 98)						
1: Cabinets without lateral panel supplied with joining kit 2: Double the number of traps for a height of 200 mm						

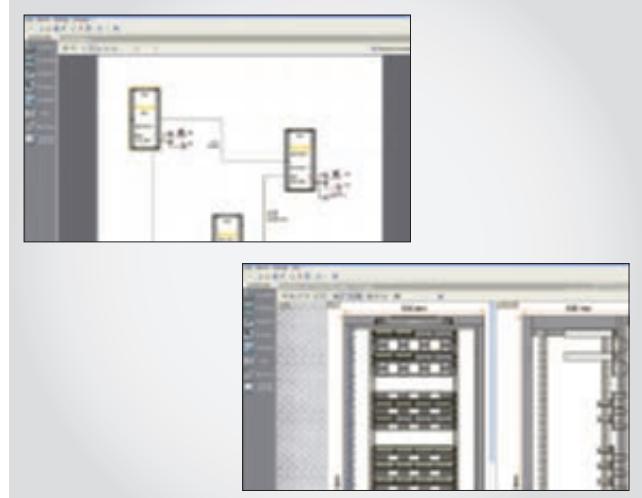

# Your LCS<sup>2</sup> cabinet in a few clicks

The new LCS Pro<sup>2</sup> software lets you quickly and easily select your products, view your cabinet, and more

## DISCOVER THE NEW FEATURES

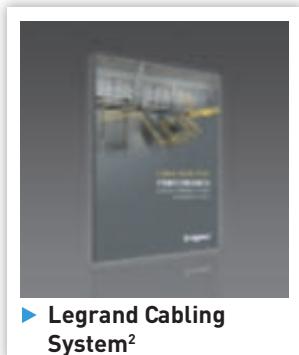

- make the synoptic of your installation
- find automatically Cat.Nos by selecting characteristic options
- visualise the cabinet installation and amend it if required
- manage your studies: technical summaries, purchase orders, document printing

# Audio/video sockets: the right system to meet your needs

## DISCOVER A FULL SYSTEM

### From the cabinets to the terminal sockets

- 19'' LCS<sup>2</sup> cabinets
- 19'' patch panels: to distribute the audio/video signal
- cords: for connecting a socket to a terminal
- cables: for connecting 2 sockets a long distance apart
- sockets: choose between 20 technologies

Cords and cables: ISO 11801 Ed.2.0, EN 50173-1, TIA/EIA 568  
Technical characteristics:  
- polycarbonate PC hood  
- polypropylene PP base  
- RAL 7035  
- hold connector units in place in the box: 100 N  
- Cables anchored on support using Colring cable ties

#### Area distribution boxes cat. 6

Fitted with 2 x 6 LCS2 connector blocks  
RJ 45 cat. 6 and RJ 45 blanking plates  
Supplied with Colring cable ties

1 0 335 44  
1 0 335 45  
1 0 335 46

#### Self-assembly area distribution box for cat. 6a, 6 and 5e

Used for mounting LCS2 RJ 45 connector blocks cat. 6a (p. 62), RJ 45 connector blocks cat. 6 (p. 66) or RJ 45 connector blocks cat. 5e (p. 72)

Pack	Cat.Nos
------	---------

#### Cords cat. 6 - RJ 45/RJ 45

For direct connection via RJ 45 male plug to the zone distribution box and to the RJ 45 socket with copper feedthrough to ensure:  
- safe connection  
- speed and reliability of connection  
Blue RAL 5015

##### U/UTP unscreened impedance 100 Ω

Length 8 m  
Length 15 m  
Length 20 m

##### F/UTP screened impedance 100 Ω

Length 8 m  
Length 15 m  
Length 20 m

Pack	Cat.Nos
------	---------

#### Cords cat. 5e - RJ 45 / stripped

RJ 45 - straight stripped  
Clip on and off in the area distribution boxes and RJ 45 socket connection via LCS2 connector via the stripped side  
Cords prepared in factory, "ready for wiring"  
Conform to standards ISO/IEC 11801 Ed. 2.0, EN 50173-1 and TIA/EIA 568  
Grey RAL 7035  
Wiring in T 568 B

##### U/UTP unscreened impedance 100 Ω

Length 8 m  
Length 15 m  
Length 20 m

##### F/UTP screened impedance 100 Ω

Length 8 m  
Length 15 m  
Length 20 m

Pack	Cat.Nos
------	---------

#### Cords cat. 5e - RJ 45/RJ 45

For direct connection via RJ 45 male plug to the zone distribution box and to the RJ 45 socket with copper feedthrough to ensure:  
- safe connection  
- speed and reliability of connection  
Grey RAL 7035

##### U/UTP unscreened impedance 100 Ω

## Legrand cabling system LCS<sup>2</sup> category 6 and 5e

feedthrough sockets - Mosaic™ Programme and Arteor

0 786 22

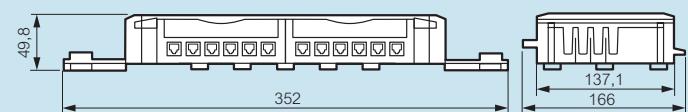

0 786 25

Certified as conforming to standards ISO 11801 ed. 2.0, EN 50173-1 and EIA/TIA 568  
Contacts marked with 568 A and B dual colour code and numbers  
Connectors with self-stripping terminals  
Possibility of re-wiring in the event of error  
Multidirectionnal cable entry  
For use with area distribution boxes (p. 70), connection to boxes via RJ45-RJ45 dedicated cords (p. 70)  
Used to create cat. 6 and cat. 5e links in accordance with standards  
2 modules

Pack	Cat.Nos	Sockets with copper feedthrough cat. 6

## Legrand cabling system LCS<sup>2</sup> area distribution boxes

### Dimensions

### Performance

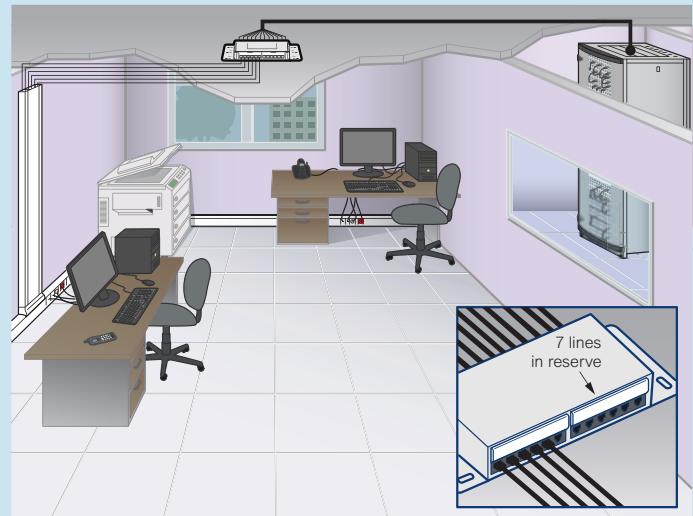

Maximum recommended lengths of links to ensure high performance of the systems with the use of RJ 45 sockets with copper feedthroughs and/or RJ 45 sockets

	Length associated lengths (m)		Links
	Cords	Cables	
<b>Cat. 6</b>	8	70	78
	15	60	75
	20	55	75
<b>Cat. 5e</b>	8	75	83
	15	65	80
	20	60	80

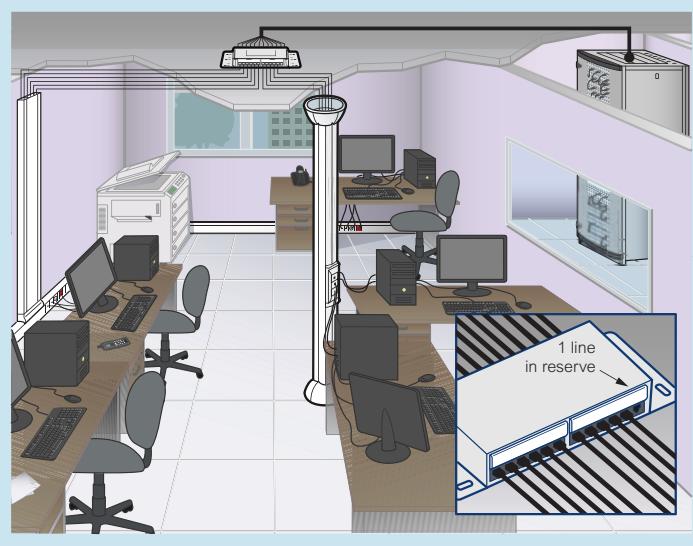

We recommend selecting the shortest wiring lengths for more flexibility regarding cord length in the event of reconfiguration

### Application example

An area distribution box is installed to connect the RJ 45 sockets and meet the future requirements of the installation

Connection to additional RJ 45 sockets is done by adding RJ 45 - RJ 45 cords between the unit and the RJ 45 sockets with copper feedthrough

10	0 335 91	Black

#### Blanking plate for 19" panel

Black

#### Ethernet switches 100 Mbps

Mounted in the patch panel  
Conform with standards IEEE 802.3, EN 500 81-1 and EN 500 82-1 (Conformity with EMC requirements)

#### Switch units for patch panel

Clip directly onto the patch panels  
7 RJ 45 ports at the front, 1 of which is a cascade port

Power supply with transformer provided  
6 RJ 45 ports + 1 LC type optic port with front-mounted cascade 100 base FX type LC  
Power supply via transformer provided

#### Copper/fibre optic converter units

Simply and quickly permit copper to fibre conversion and vice versa

Clip directly onto the patch panels  
Fitted with an SC type fibre optic connector  
10/100 base T to 10/100 base FX type SC  
1000 base T to 1000 base SX type SC

#### Midspan Power over Ethernet (PoE) injectors, 802.3 af

4 inlets/outlets  
Used for supplying 4 Wi-Fi access points  
Clips directly onto a patch panel  
1 inlet / outlet  
Used for supplying a Wi-Fi access point  
Direct connection to the patch panel

#### RJ 45 doubler sockets

Provide increased security against theft and damage to double connectors  
Provide a rate of 10/100 Mbps  
Multidirectionnal cable entry  
Can be installed in all supports depth min. 35 mm  
1 module

## customised fibre optic links

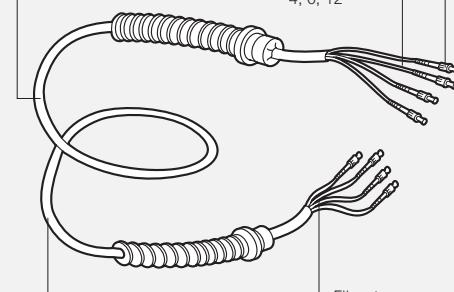

### ↓ FIBRES PRE-FITTED WITH CONNECTORS

Length of link  
(from connector to connector in metres)  
Link supplied with protective sleeve  
and compression gland pull system  
to facilitate entry into the fibre optic  
enclosures

Connectors:

Number of  
fibres:  
4, 6, 12

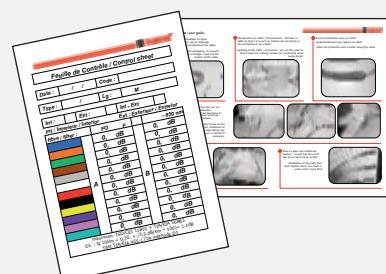

Fibre type  
Multimode: 62.5/125 µm  
Conforms with category OM1  
Multimode: 50/125 µm  
(ensured speed 1 Gbps)  
Conforms with category OM2  
Multimode: 50/125 µm  
(ensured speed 10 Gbps over 300m)  
Conforms with category OM3  
Monomode: 9/125 µm

(ensured speed 10 Gbps)  
Conforms with category OS1

### ↓ DOCUMENTS

Each link is supplied with a test report (fibre by fibre) and illustrated operating instructions

### ↓ PACKAGING

According to length of link:

- packed  
on a reel
  - packed  
on a ring
- Connector protection by  
tube

Reel

1	0 335 19

**Singlemode fibre units (9/125 µm)**  
LC unit for 6 singlemode fibres  
SC unit for 6 singlemode fibres  
SC/APC unit for 4 singlemode fibres

**Multimode fibre units (62.5 and 50/125 µm)**  
ST unit for 6 multimode fibres  
SC unit for 6 multimode fibres  
LC unit for 6 multimode fibres  
High-density LC unit for 12 multimode fibres

Switch/fibre optic unit	
1	0 335 05

Power supply via transformer provided  
6 x RJ 45 ports + 1 cascade LC type optic port at the front  
Clips directly onto the patch panels

Copper/fibre optic converter units	
1	0 335 06
1	0 335 07

For simple and fast copper to fibre conversion and vice versa  
Clip directly onto the patch panels  
Fitted with an SC type fibre optic connector  
10/100 base T to 10/100 base FX type SC  
1000 base T to 1000 base SX type SC

Fibre optic cassette for patch panel	
1	0 335 11

Ensures fibre coiling (from 2 to 12 fibres)  
Takes a fibre optic unit  
Cat.Nos 0 335 12/13/16/17/18/19  
Used for linking copper and fibre optic blocks on the same LCS<sup>2</sup> patch panel

Sockets with fibre optic feedthrough	
1	0 786 16
1	0 786 17
1	0 786 18
1	0 786 14

Fitted with duplex feedthrough 2 inlets/2 outlets  
Used for connecting 2 fibres (fitted with their connector)  
Supplied with protective caps  
Fitted with transparent marker holder  
2 modules

**Socket with fibre optic feedthrough 2 x ST**  
Bayonet connection (STII compatible)  
 White

**Socket with fibre optic feedthrough 2 x SC**  
Push-pull connection  
 White

**Socket with fibre optic feedthrough 2 x LC**

		12 fibre breakout kit

# Legrand cabling system LCS<sup>2</sup>

## fibre optic optic connectors

### ■ Technical characteristics

- Connection of connectors on 900 µm fibre
- Maximum attenuation 0.3 dB
- Ideal for high-speed systems: 10 gigabit Ethernet
- Operating temperature: 0 to 65 °C
- Shallow connectors

### ■ Advantages:

- High quality finish
- Can be reused 5 times
- Shallow connector; depth less than 40 mm
- Connector factory pre-polished and does not require any glue
- No special tools, easy to transport
- Speed of installation: simple connection process, quick training  
It takes less than five seconds to fit the connector

### ■ The basic steps

#### Preparation of the fibre:

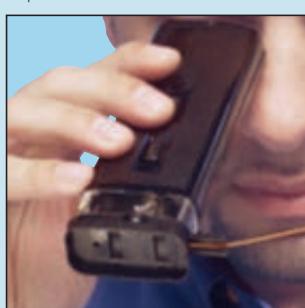

Stripping

Cleaving

Inspection

### Connection:

1/ Insert the fibre in the connector

2/ Slide the switch on the connector -  
the splice is done

3/ Slide the boot onto the connector

Finally, the visual fault locator is used  
to check the connection.

### ■ Rapid crimping connectors with tool case Cat.No 0 326 90

#### Types of connector

- ST connector: Helical shape locked by "push and turn" bayonet type connector

- SC connector: Rectangular shape "push-pull" latch type locking  
Suitable for a large number of active devices  
Recommended in the generic standards ISO/IEC 11801 and EN 50173

- LC connector: Rectangular shape tab locking  
Half the size of a conventional connector

## Legrand cabling system LCS<sup>2</sup> fibre optic area distribution boxes

0 335 40

0 335 40 fitted with SC fibre optic unit, accessory  
Cat.No 0 335 20 and a 6 x RJ 45 connector unit

0 335 20 fibre optic  
accessory

0 786 16

0 786 17

0 786 18

### Area distribution box

For distribution of low current in an area fitted with 1 to 12 RJ 45 sockets  
Centralise connections to guarantee flexibility and adaptability of the installation  
Installed on false ceiling or false floor  
Connect to the patch panel or the floor cabinet  
Conform to standards UTE C 15-900, NF C 15-100, NF C 20-730, EN 50-174.2, CEI 60950, ISO/IEC 11801 Ed. 2.0, EN 50173-2 and TIA/EIA 568  
Colour code and wiring schemes T 568 A and T 568 B  
Cords and cables: ISO 11801 Ed.2.0, EN 50173-1, TIA/EIA 568  
Technical characteristics:  
- polycarbonate PC hood  
- polypropylene PP base  
- RAL 7035  
- hold connector units in place in the box: 100 N  
- Cables anchored on support using Colring cable ties

#### Self-assembly area distribution box

Used for fitting fibre optic accessory units

### Fibre optic accessory

1 0 335 20 Used for fitting fibre optic units (p. 79) and the fibre coil in the area distribution box

### Sockets with fibre optic feedthrough

Fitted with duplex feedthrough 2 inlets/2 outlets  
Used for connecting 2 fibres (fitted with their connector)  
Supplied with protective caps  
Fitted with transparent marker holder  
2 modules

#### Socket with fibre optic feedthrough 2 x ST

Bayonet connection (STII compatible)  
 White

#### Socket with fibre optic feedthrough 2 x SC

Push-pull connection  
 White

#### Socket with fibre optic feedthrough 2 x LC

Push-pull connection  
 White

#### Socket with fibre optic feedthrough 2 x SC/APC

Push-pull connection  
With shutters  
 White

## Legrand cabling system LCS<sup>2</sup> Wi-Fi access points

0 335 21

0 779 13

0 335 24

Technical characteristics p. 104

Pack	Cat.Nos	Manageable Wi-Fi access points 802.11n
1	0 335 22	Coverage area: 600 m <sup>2</sup> Dual band 2.4 GHz or 5 GHz Conforms with standard 802.11 a, b, g, n Theoretical speed: 300 Mbps gross MIMO 2x2, supports up to 4 SSIDs False ceiling integration - PoE power supply (Power over Ethernet - standard IEEE 802.3 af) Network connection via a tool-free RJ 45 connector The installation must include at least: - a Wi-Fi access point (false ceiling) - a PoE injector Cat.No 0 335 01 conforming with 802.3 af (LCS <sup>2</sup> unit format) to be installed in the patch cabinet Can be configured centrally via controller Cat.No 0 332 25 or via configuration software Cat.No 0 335 24 or individually The management function allows the network administrator to manage Wi-Fi access points remotely via a web https interface Security via WEP, WPA and WPA2 (802.11i) encryption and 802.1x authentication QOS WMM compatible and supports SNMP management Guest access: independent access to the private Wi-Fi network Energy saving with standby management Wi-Fi surface-mounted access point 802.11n Wi-Fi ceiling-mounted access point 802.11n
1	0 335 21	

Pack	Cat.Nos	Manageable Wi-Fi access points 802.11a & b/g
1	0 779 14	Dual-band and dual-radio Conform with standards 802.11a and 802.11b/g Gross speed: 54 Mbps max. on each frequency (802.11a and 802.11g) simultaneously Can be integrated into all compatible supports with minimum 40 mm depth Tool-free network connection via RJ 45 connector PoE power supply (Power over Ethernet - standard 802.3 af) The installation must include at least: - Wi-Fi access point - a PoE injector conforming with 802.3af (LCS <sup>2</sup> unit format) to be installed in the patch panel The management function allows the network administrator to manage Wi-Fi access points remotely via a web interface Security via WPA2 encryption (802.11i) and 802.1x authentication Guest access: allows visitors free access to the Internet (access independent of the main Wi-Fi network) 4 modules
1	0 779 13	Equipped with an RJ 45 socket on the front panel <input type="radio"/> White Without RJ 45 socket outlet <input type="radio"/> White
1	5 723 76	With RJ 45 socket on front <input type="radio"/> White
1	5 728 76	With RJ 45 socket on front <input checked="" type="radio"/> Magnesium
1	5 723 77	With no RJ 45 socket <input type="radio"/> White
1	5 728 77	With no RJ 45 socket <input checked="" type="radio"/> Magnesium
1	5 723 78	With no RJ 45 socket Standard 802.11b/g only <input type="radio"/> White
1	5 728 78	With no RJ 45 socket Standard 802.11b/g only <input checked="" type="radio"/> Magnesium

1	0 335 24	<b>Centralised configuration software</b> <b>Access point manager</b> Allows the installation of a secure Wi-Fi network with centralised management of the Wi-Fi access points The installation must include at least: - Wi-Fi access points - a PoE injector conforming with 802.3 af (LCS <sup>2</sup> unit format) to be installed in the patch cabinet
---	----------	---

## Legrand cabling system LCS<sup>2</sup> Wi-Fi network management system

0 335 25

0 332 93

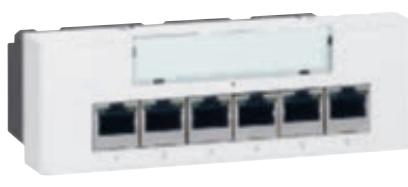

Technical characteristics p. 104

Pack	Cat.Nos	Wi-Fi network management system
1	0 335 25	<b>Supervisory controller</b> Allows the installation of a secure Wi-Fi network with filtering and traceability Possibility of managing private and public access to the Wi-Fi network Possibility of billing for network access (in hotels for example) Can be installed in addition to structured wiring New or existing LCS <sup>2</sup> to meet the needs of mobile and travelling workers The management function allows the network administrator to manage the Wi-Fi access points remotely with configuration software included Supports SNMP management with an embedded DHCP server Integrates into the patch cabinet Allows the configuration up to 5 terminals centralised on an IT network and to manage 50 connections at the same time The installation must include at least: - 1 supervisory controller - Wi-Fi access points (false ceiling) - 1 PoE injector conforming with IEEE 802.3 af (LCS <sup>2</sup> unit format) to be installed in the patch cabinet - If the installation involves more than 5 Wi-Fi access points, an extension licence must be provided
1	0 335 26	Extension licences Can be used in addition to the supervisory controller to extend the network
1	0 335 27	Allow the extension of the network to a maximum of 10 Wi-Fi access points (5 + 5) Manages up to 100 connections at the same time Allow the extension of the network to a maximum of 25 Wi-Fi access points (5 + 20) Manage up to 200 connections at the same time

		Power over Ethernet (PoE) injectors Midspan
1	0 335 01	4 inputs/outputs Supply 4 Wi-Fi access points Attach directly to the patch panel conform with standard IEEE 802.3 af
1	0 327 37	1 input/1 output

		Ethernet switches 100 Mbps
1	0 332 93	<b>Boxes to be installed on shelf</b> 5 RJ 45 port switch Power supply via transformer provided Dimensions: 116 x 70 x 25 mm
1	0 332 91	8 RJ 45 port switch Power supply via transformer provided Dimensions: 171 x 98 x 29 mm
1	0 332 81	<b>Mini shelf</b> For switch Cat.Nos 0 332 91/93 Dimensions: 220 x 220 x 43 mm For horizontal, vertical or projecting mounting of the switch Supplied with system for retaining the live product

# Audio/video sockets: the right system to meet your needs

A wide range of technologies (HDMI, HD15, RCA, YUV):  
an answer corresponding to the location and the needs of users

## DISCOVER A FULL SYSTEM

### From the cabinets to the terminal sockets

- 19'' LCS<sup>2</sup> cabinets
- 19'' patch panels: to distribute the audio/video signal
- cords: for connecting a socket to a terminal
- cables: for connecting 2 sockets a long distance apart
- sockets: choose between 20 technologies

▶▶▶ 19''LCS<sup>2</sup> cabinets, p. 87

▶▶▶ Patch panels, cables and cords, p. 87

▶▶▶ Sockets, p. 88 to 91

Technical characteristics p. 112

Pack	Cat.Nos	19" HD racks
1	0 464 06 0 464 07	Racks for high-density cabling (e.g. data centers, SANs, main distributors, etc.) Channel type 19" uprights for guiding and fixing cables, with U marking and tapped holes for fixing 19" equipment Roofing for right-left cord routing that complies with the bending radiiuses Receive 19" LCS <sup>2</sup> metal feedthrough panels, power supply units and the DIN rail kit fastened by screws Cat.No 0 464 23 (1 set of 50 supplied with the rack) Supplied with straps with hook and loop type closure Aluminium structure to be assembled Racks joined using grids Cat.Nos 0 464 25/26/27 Black Capacity   Height   Width   Depth   Permissible load (kg)   Depth of uprights (mm) 45 U   2185   604   521   675   267 45 U   2185   604   667   675   413
1	0 464 25	<b>Cord management grid</b> To be mounted between 2 joined racks or on an isolated rack The grid creates a 63 mm space between 2 joined racks for running cables and cords to the front and rear Capacity: 200 cat. 6 cords Black Grid with hinged closing latches 1965 mm x 153 mm x 156 mm

Pack	Cat.Nos	Cord management grids with door
1	0 464 26 0 464 27	Easily removable door that opens in both directions To be mounted between 2 joined racks or on an isolated rack (Cat.No 0 464 26 only) The grids create a space between 2 joined racks (63 mm for Cat.No 0 464 26, 165 mm for Cat.No 0 464 27) for running of cables and cords to the front and rear Side cord channels every 1 U Capacity: 200 cat. 6 cords for Cat.No 0 464 26, 580 cords for Cat.No 0 464 27 Supplied with 12 bend limiting clips and 4 cooling supports Black 1970 mm x 165 mm x 204 mm 1970 mm x 267 mm x 331 mm

Pack	Cat.Nos	<b>Cable tray supports</b>
1	0 464 18 0 464 19	To be fitted in the depth of the rack to support a high cable tray (cable trays Cat. No 0 464 69/70 p. 98) For rack Cat.No 0 464 06 For rack Cat.No 0 464 07
Pack	Cat.Nos	<b>Lower finishing plates</b>
1	0 464 15 0 464 16	Metal plates provide the finishing of the lower part of the rack and protection against dust The sides of the plates can be folded easily for direct insertion of cables in the 19" upright channel For rack Cat.No 0 464 06 For rack Cat.No 0 464 07
Pack	Cat.Nos	<b>19" cord management panels</b>
1	0 465 70 0 465 71	1 axis closed panels with pivoting cover Depth 172 mm Black 1 U 2 U
Pack	Cat.Nos	<b>19" equipment screws</b>
1	0 464 23	Set of 50 special screws for 19" HD racks and 25 earthing claws

Pack	Cat.Nos	Wall-mounting VDI rack for Atlantic and Marina cabinets
1	0 462 27	For integrating 19" VDI equipment in Atlantic cabinets (Cat.Nos 0 355 xx) and Marina cabinets, width 600 or 800 mm and depth 250 mm min. In cabinets width 400 mm, the rack enables 10" VDI equipment to be incorporated (p. 93) Can be fixed directly on the wall to create a wall-mounted rack (without cabinet) Self-locking cable ties and cable ties with tightening indicator (p. 98) can be fitted
1	0 462 28	6 U rack
1	0 462 29	12 U rack 16 U rack

### Cable entry for Atlantic cabinets width 600 or 800 mm and 19" equipment

#### Cable entry

IP 43 cable entry plate with brush (cable feedthrough 385 x 30 mm)  
IP 55 cable entry plate with multi-entry cable glands  
Supplied with 12 ISO 32 cable glands  
Each cable gland allows the insertion of 4 UTP/FTP/SFTP cables (Ø6.5 to 9.5 mm)  
Cords with connectors can be fed through without having to dismantle the cable gland  
Supplied with blanking plates for unused entries

#### Fixed shelf

Projecting mounting on 2 x 19" uprights  
Fast screw-free assembly  
Max. load 15 kg  
Height 2 U  
Black RAL 9005  
Depth 115 mm

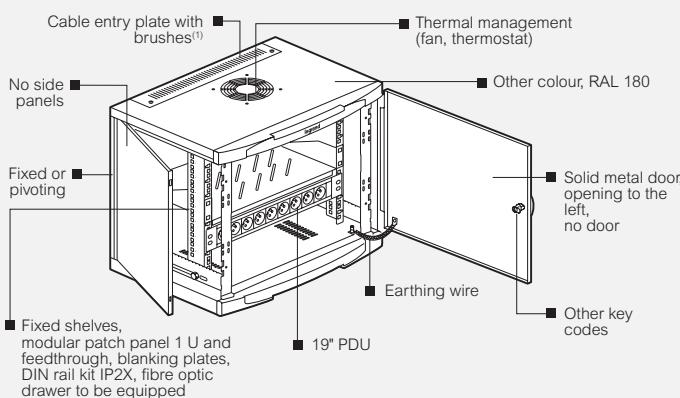

1: Without levelling feet (+ 28 to 34 mm with feet)

## customised 19" LCS<sup>2</sup> cabinets

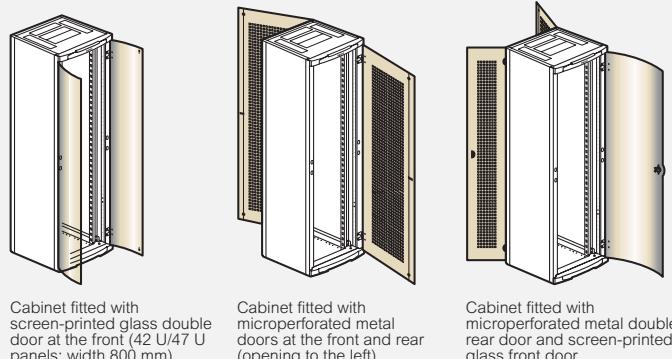

### ↓ 19" LCS<sup>2</sup> WALL-MOUNTING CABINETS

(1) Pivoting cabinets

### ↓ 19" LCS<sup>2</sup> FREESTANDING CABINETS (CONTINUED)

Option of solid or microperforated metal doors, screen-printed glass doors, double doors or no doors

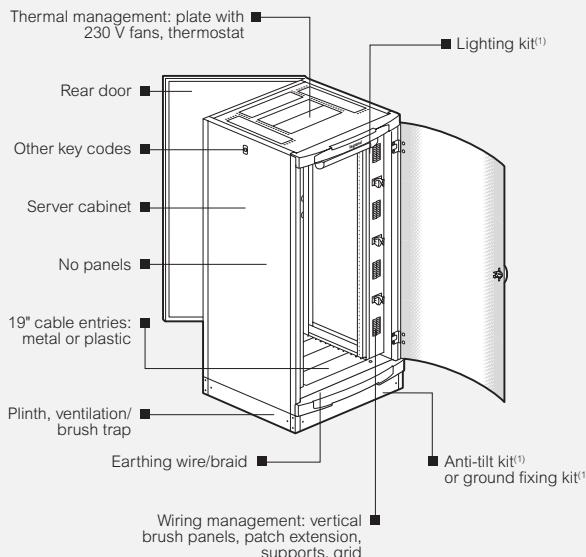

### ↓ 19" LCS<sup>2</sup> FREESTANDING CABINETS

#### 30 SIZES

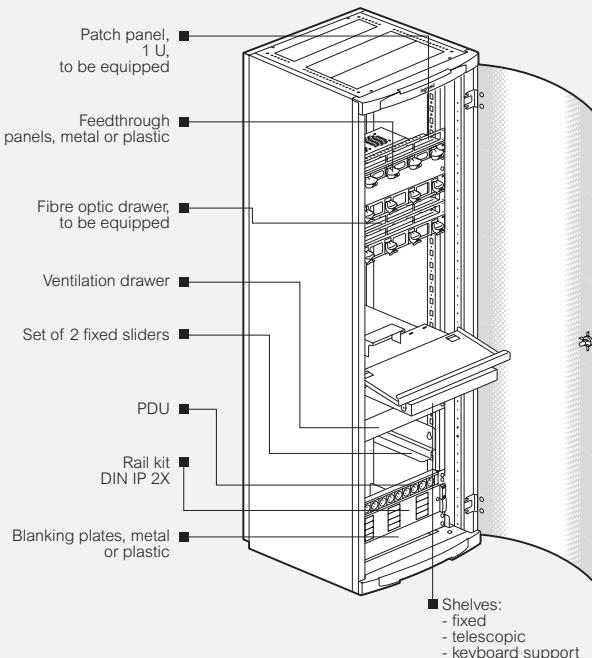

Capacity	24 U	29 U	33 U	42 U	47 U
Width	600 or 800 mm				
Depth	600, 800 or 1000 mm				

#### CABINET DEFINITION

1: Supplied ready for assembly

#### 19" EQUIPMENT ASSEMBLY

### ↓ COLOURS

180 RAL colours available.  
Optional touch-up brush  
in the selected RAL

## Legrand cabling system LCS<sup>2</sup>

### ■ Compliance of the LCS<sup>2</sup> systems with standards and certifications

LCS<sup>2</sup> systems and components (de-embedded) conform to the following standards:

- TIA/EIA 568C
- EN 50173-1 and EN 50173-2
- ISO/IEC 11801 version 2

The LCS<sup>2</sup> system supports 10G applications Base-T up to 100 m in a transmission channel

Conforms with standards ISO/IEC 24750, TIA TSB 155 and IEEE 802.3 an

The Ea link class of the LCS<sup>2</sup> system also conforms with amendment 1 (04/2008) of standard ISO 11801 and its components conform with amendment 2

LCS<sup>2</sup> systems are certified by expert independent laboratory 3P

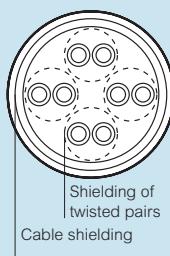

### ■ Main characteristics of the LCS<sup>2</sup> systems

	LCS <sup>2</sup> 6A	LCS <sup>2</sup> 6	LCS <sup>2</sup> 5e
Frequency	500 Mhz	250 MHz	100 Mhz
Speed	10 Gbit/s	1 Gbit/s	1 Gbit/s
Wiring	Copper	FO	Copper
Connectors	RJ 45	SC-LC...	RJ 45
Length cable max.	100 m	variable	100 m

### ■ New names for LAN cables (according to ISO 11801-2)

They correspond to: "type of cable shield"/ "type of twisted pair shield" TP monitoring (for twisted pairs)

Type of cable	Shield of the cable	Shield of pairs twisted
old name	new name	
SSTP	S/FTP	S: screen made up
		F: screen formed a metal braid of a ribbon alumin/polyester
SFTP	SF/UTP	SF: combination of ribbon + braid
		U: no screen
STP	U/FTP	U: no screen
		F: screen formed of a ribbon alumin/polyester
FTP	F/UTP	F: screen formed of a ribbon alumin/polyester
		U: no screen
UTP	U/UTP	U: no screen

### ■ Area distribution boxes

#### Compliance with standards:

Area distribution box: TIA/EIA 568  
UTE C 15-900  
NF C 15-100 - NF C 20-730  
EN 50-174.2  
ISO 11801  
EN 50173  
IEC 60950

Cords and cables: ISO 11801 id.2.0, EN 50173-1, TIA/EIA 568

#### General characteristics:

- 6 or 12 incoming ports (depending on Cat.No)  
RJ 45 wiring
- 4 to 8 or 12 outgoing ports (depending on Cat.No) maximum  
Connection of mixed cords via RJ 45 connector  
(RJ 45/stripped)
- UTP and FTP versions
- Cat. 5e and 6
- for computer applications; telephone, access control etc.

#### Technical characteristics:

- material: Polycarbonate PC hood  
Polypropylene PP base
- colour: RAL 7035
- Weatherproofing protection index: IP 21
- Mechanical shock protection index: IK 07
- hold connector units in place in the box: 100 N
- Cables anchored on support using Colring cable ties

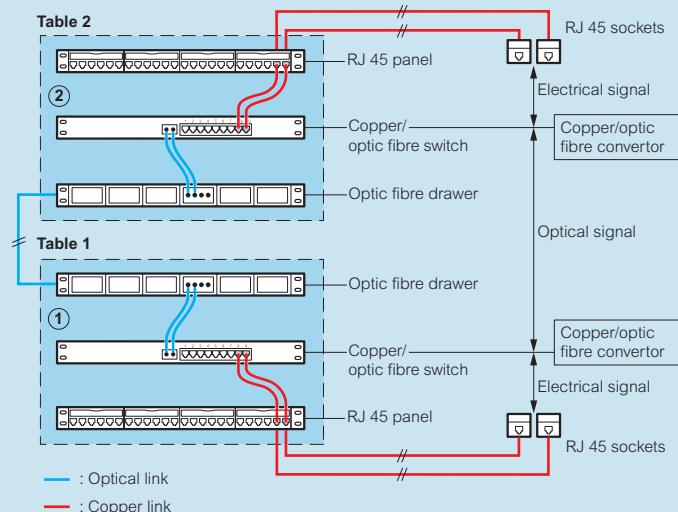

### ■ Fibre optic

#### ■ New optical classes ISO 11801 2nd Ed.

##### Parameters of the optical link (ISO 11801/EN 50173)

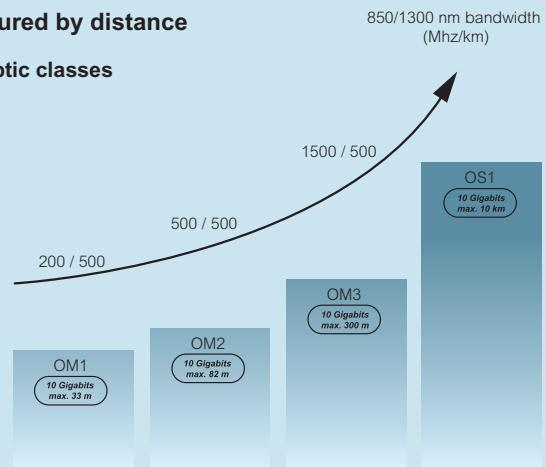

Parameter	Multimode		Monomode	
	850 nm	1 300 nm	1 310 nm	1 550 nm
Fibre attenuation dB/km	3.5 max.	1.5 max.	1.0	1.0
Bandwidth MHz.km	200 min.	500 min.	n/a	n/a
Connector attenuation dB	0.75 max.	0.75 max.	0.75 max.	0.75 max.
Return loss dB	20 min.	20 min.	26 min.	26 min.

### ■ Typical layout of an optical link between 2 distribution blocks

### ■ Speed ensured by distance

#### ISO 11801-2 optic classes

Protocols (length max.)	Multimode fibre			Monomode fibre
	OM 1	OM 2	OM 3	OS 1
10 Gb Ethernet (S/L base)	33 m	82 m	300 m	10 km
Ethernet Gb (LX base)	550 m	550 m	550 m	2 km
Ethernet Gb (SX base)	275 m	550 m	550 m	-
Fast Ethernet	2000 m	2000 m	2000 m	2 km
Ethernet 10 Mbps	2000 m	1514 m	1514 m	-
Desired perennity	> 10 years	10 to 15 years	> 15 years	> 15 years
Market trend	↘ ↘	↗	↗ ↗	↗

## Legrand cabling system LCS<sup>2</sup> (continued)

### ■ Flush-mounting Ethernet 10/100 base T switches

	779 00	779 01	779 20
Power supply	230 V	PoE	230 V
Speed	100 Mbps		
Standards	802.3 / 802.3u	802.3u 802.3 af	802.3 / 802.3u
Common technical characteristics	<ul style="list-style-type: none"> <li>• Operating temperature: from 0°C to +40°C</li> <li>• Max. humidity level permissible: 95 %</li> <li>• Auto MDI-X (takes crossed and straight cords)</li> <li>• Orange LED: - on: speed of 100 Mbps - off: speed 10 Mbps</li> <li>• Green LED on traffic</li> </ul>		
Additional characteristics			<ul style="list-style-type: none"> <li>• SNMP V2C (RFC 1901-1908)</li> <li>• Support MIB II (RFC 1213)</li> <li>• IP addressing via DHCP (according to RFC 2131)</li> <li>• Can be administered via WEB interface</li> <li>• Backup and updating of configuration files (Upload/download)</li> </ul>

### ■ Mosaic Wi-Fi access points

#### An 802.11 a and b/g solution

	MOSAIC WiFi Access Point Cat. Nos 77913/14	LCS <sup>2</sup> Cat. Nos 335 21/22
Radio communication standard	802.11 b/g	802.11 a
Power supply standard	Power over Ethernet 802.3 af	
Frequency band	2.4 GHz	5 GHz
Channel width	20MHz	20MHz
Max. gross speed	54 Mbps max	54 Mbps
		300 Mbps

### ■ Installation principle for a Wi-Fi access point with Power over Ethernet injector

Particular case of the 1 port PoE: Clips directly onto a port on any patch panel

A single cord is necessary to connect it to a port on the switch

### ■ Benefits of a Legrand Wi-Fi access point

- Possibility of simultaneous operation on 2 frequencies, a and b/g
- New products: invited access: used to allocate a network dedicated to visitors
- Provides a max. gross speed of up to 2 x 54 Mbps in simultaneous mode
- Very high security level: WPA2 encryption (802.11i) and authentication (802.1x)
- Possibility of roaming (moving from one access point to another without breaking the link)
- Quality of service (priority automatically given to voice, then video and finally data)
- Easy to configure and make secure: using the CD supplied with the access point

### ■ Installation

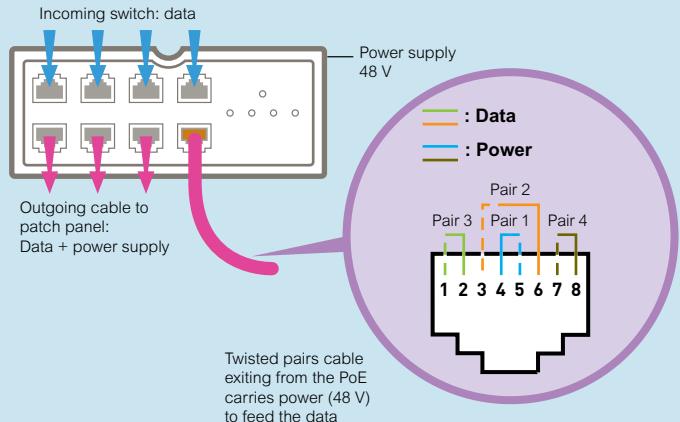

In all supports able to take a Mosaic mechanism (trunking, columns, flush-mounting boxes, floor boxes, etc.)  
Do not place access points behind anything that could limit the antenna's range  
Access points are connected tool-free via an RJ 45 connector

### ■ Sizing

- Provide 1 access point for 1 localised requirement (in entrance hall)
- Provide 1 access point per 100 m<sup>2</sup> for overall coverage and a maximum gross speed
- Provide 1 access point with an RJ 45 socket for a desk used by visitors

### ■ Operation of PoE injector

A PoE injector has one input and one output per access point to be supplied

# Legrand cabling system LCS<sup>2</sup>

## LCS<sup>2</sup> 19" and 10" wall-mounting cabinets

### ■ General characteristics

Metallic wall-mounting cabinets  
RAL 7016 textured polyester coating providing excellent resistance to corrosion and scratching  
Front safety glass door  
Protection index (weatherproof) against solid objects and liquids: IP 20  
Protection index against mechanical shocks: IK 08  
Perforations in uprights: 9.5 x 9.5 mm  
Permissible load: 3 kg/U (or 48 kg for a 19" cabinet 16 U)  
12 kg for the 10" cabinet 6 U

### ■ Compliance with standards

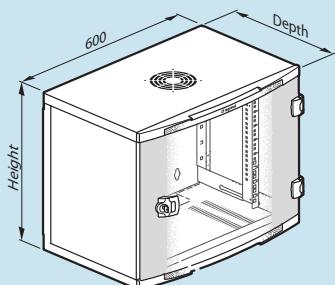

LCS<sup>2</sup> cabinets comply with the following standards:

<b>IEC 60529 EN 60529</b>	(NF C 20-010) Degrees of protection provided by enclosures (IP code)
<b>IEC 62262 EN 62262</b>	(EN 50102, NF C 20-015) Degrees of protection provided by enclosures of electrical material against external mechanical impacts (IK code)
<b>IEC 60950-1 EN 60950-1 C 77-210-1</b>	Safety of data processing equipment
<b>EIA-310-D</b>	Cabinets, enclosures, panels and associated equipment (ANSI / EIA / 310-D-1992)
<b>IEC 60297-1 &amp; 2 DIN 41414-7</b>	(NF C 20-150, NF C 20-151) Sizes of mechanical structures of the 482.6 mm (19 in) series

LCS<sup>2</sup> cabinets can be integrated into installations complying with the following standards:

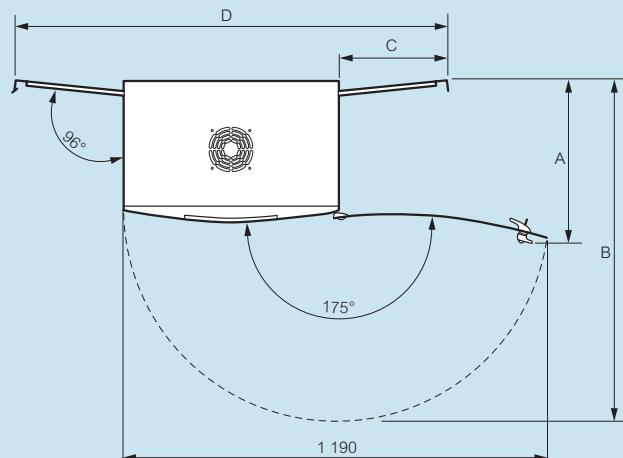

<b>EN 50173-1</b>	Information technology - Generic cabling systems
<b>EN 50174-1 &amp; 2 C 90-480-1 &amp; 2</b>	Information technology - Cabling installation
<b>ISO IEC 11801</b>	Information technology - Generic cabling for customer premises
<b>NF C 15-100 Part 4-41</b>	Low voltage electrical installations - Recommendations
<b>UTE C90-483</b>	Residential cabling for communication networks

#### Swing latch replacement installation

Installation can be either right or left hand swing out

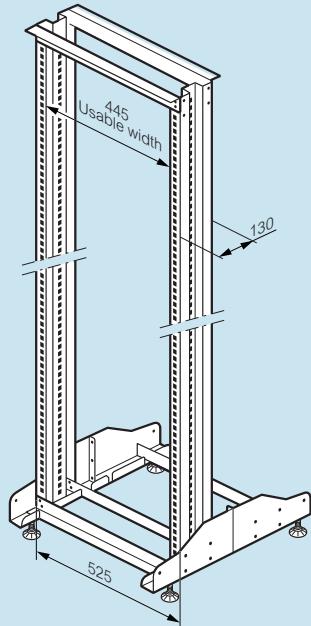

## 19" bati-rack

### ■ General characteristics

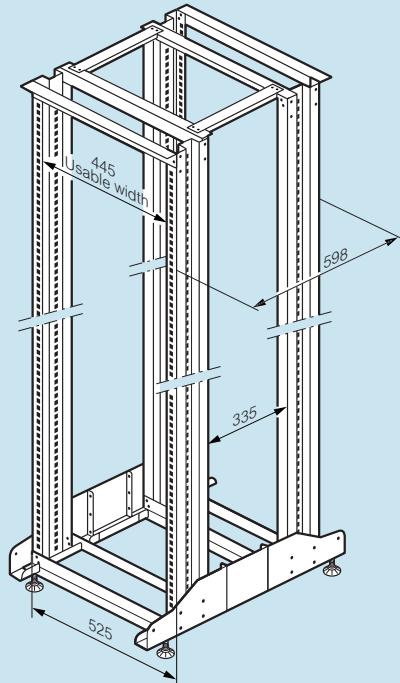

Metallic bati-rack  
RAL 7035 textured polyester coating providing excellent resistance to corrosion and scratching  
Perforations in 19" uprights: 9.5 x 9.5 mm  
Permissible load: 300 kg

### ■ Dimensions (mm)

2 uprights bati-rack Cat.No 0 463 95

4 uprights bati-rack Cat.No 0 463 96

## wall-mounting rack for weatherproof cabinets

### ■ Rack mounting in weatherproof cabinets

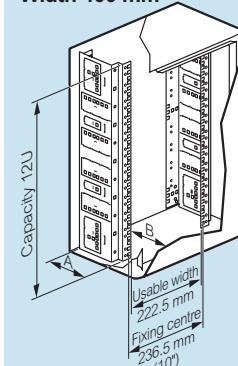

Perforations in uprights: 9.5 x 9.5 mm
